Notes:

GETTING STARTED

SECTION TOPICS:

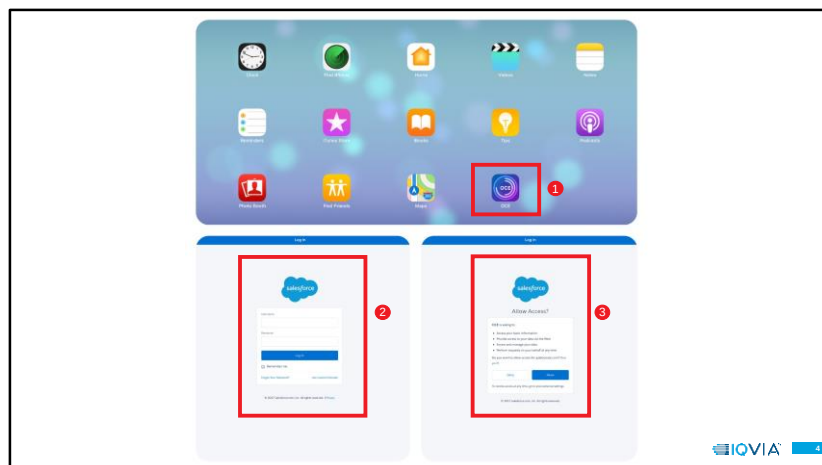

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out

Notes:

GETTING STARTED

- **Log in to OCE**
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

LOG IN TO OCE

To access the functionality of OCE, users must log into the application:

Step	Action
1	Tap the OCE icon to launch the application.
2	Enter your salesforce.com ID and password into Username and Password fields, and then Tap Log In .
3	Tap Allow to authorize access to your information.

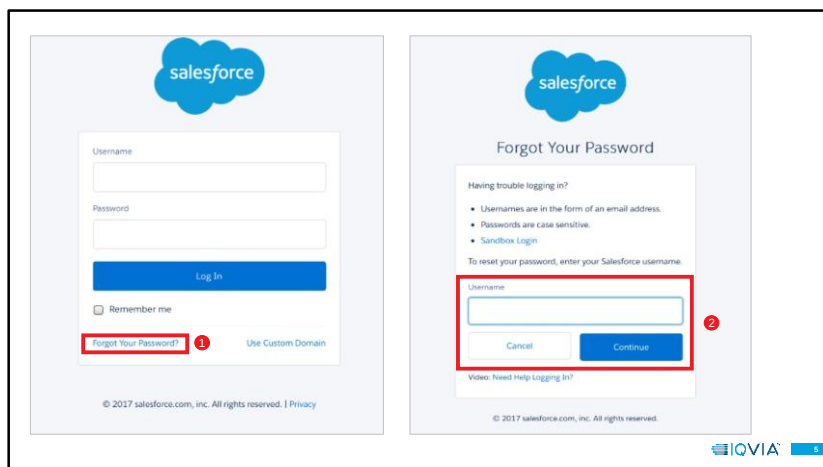

TIP

- Check “Remember me” to save from typing username the next time you log on.

GETTING STARTED

- Log in to OCE
- **Reset Password**
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

RESET PASSWORD

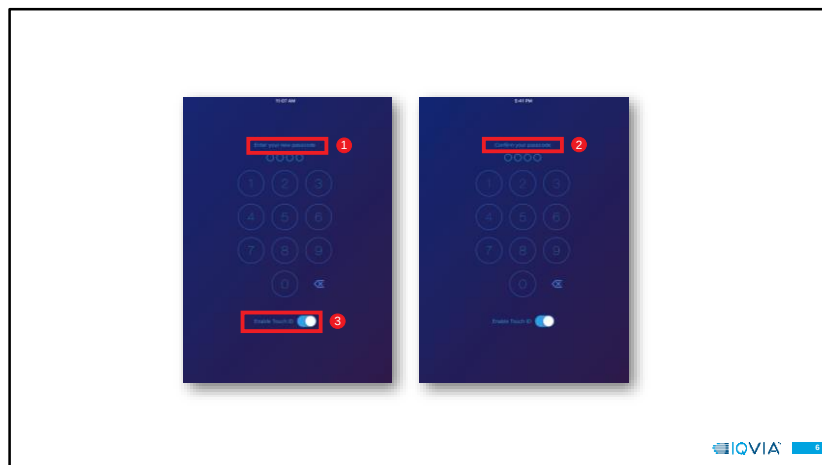

If you forget or are unable to log in, resetting your password will send a link to your email address. From the link, you will be able to change your password and log in.

Step	Action
1	Tap Forgot Your Password? on the login screen.
2	Enter your Username (usually your email address) and Tap Continue .
3	Tap the link provided in the email and you will be prompted to change your password.

GETTING STARTED

- Log in to OCE
- Reset Password
- **Set and Change Passcode**
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing Application
- Optimizing the Database
- Submitting the Database

Notes:

SET PASSCODE

The application asks you to set a passcode after the initial authentication is complete.

Passcodes are used to unlock OCE when it is locked (for example, if you close the application without logging out). When you want to unlock the system, you will need to enter this passcode.

Step	Action
1	Key in a new passcode to access the OCE application.
2	Key in the passcode again to confirm it.
3	Select the Touch ID option if you want to be able to use touch recognition to unlock the application.

CHANGE PASSCODE

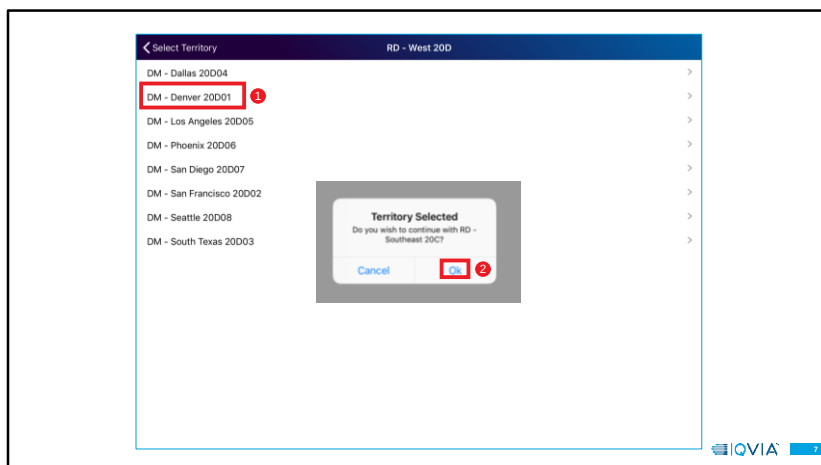

If you need to change your passcode for any reason, do the following:

Step	Action
1	Tap the user icon in the lower left corner of the application.
2	Tap Change Passcode . Refer to Set Passcode instructions.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- **Select Territory**
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

SELECT TERRITORY

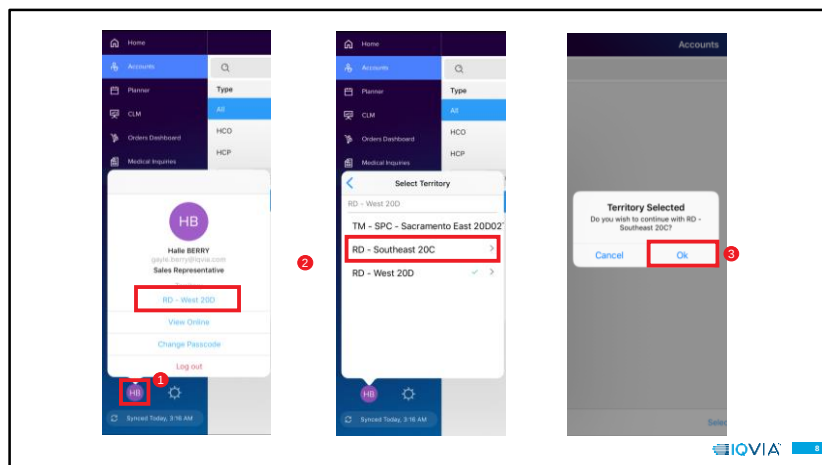

If you have only one territory assignment, the application will open to your default territory. But if you have multiple territories assigned to you, you will have to select the one you wish to work in initially.

Step	Action
1	Select the territory in which you want to work. When selecting a territory, if you tap a parent level territory, a list of its child territories is displayed, enabling you to get down to a lowest level territory.
2	Tap Ok to confirm.

NOTE: If only one territory is available to you, you do not have to select it.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- **Switch Territory**
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

SWITCH TERRITORY

Data is displayed only for a single selected territory. If an account has multiple territories associated with it, these can easily be switched.

Notes:

Step	Action
1	Tap the User Account icon to view the current territory displayed. Territory links will appear if you are configured for additional territories.
2	Tap the territory to which you want to switch. Note: If you want to select a child territory of the selected territory, tap the arrow mark next to the territory name, and then Tap the child territory.
3	Tap Ok .

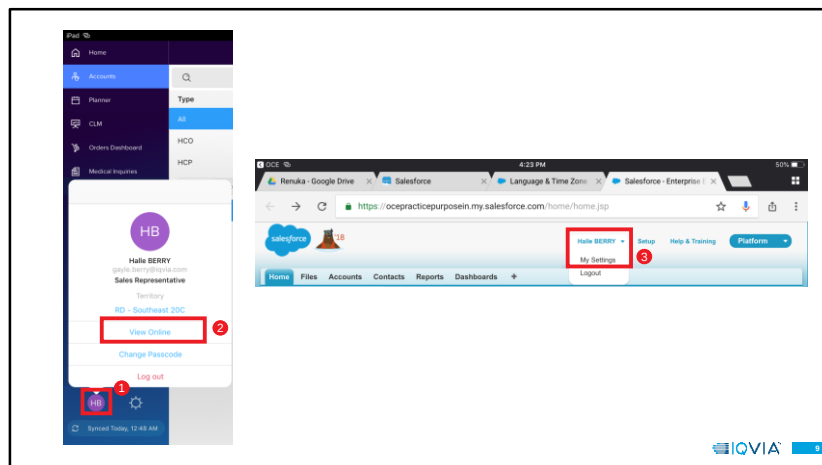

TIP:

After switching territory, full synchronization will occur automatically to retrieve current data for the selected territory.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- **Set Language**
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

SET LANGUAGE

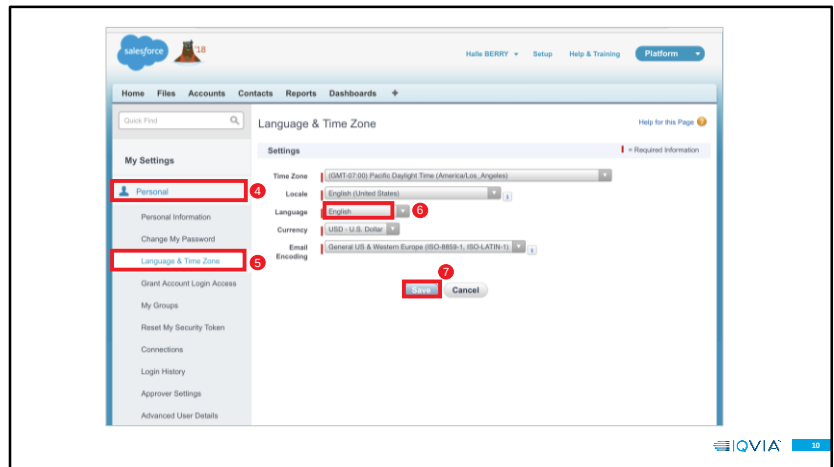

To modify the language preferences in the online application:

Step	Action
1	Tap the User Account icon.
2	Tap View Online .
3	Tap the User's Profile and select My Settings . Note: If you don't see this option, you may need to select Full Site from the menu.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- **Set Language**
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

SET LANGUAGE

To modify the language preferences in the online application:

Step	Action
4	Tap Personal from the left pane.
5	Tap Language & Time Zone .
6	Select your preferred language from the Language drop-down menu.
7	Tap Save .

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- **Application Screen**
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

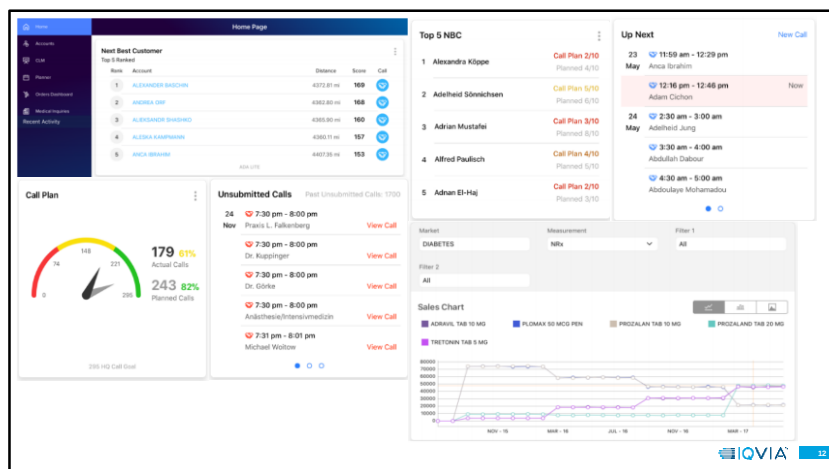

APPLICATION SCREEN

The table below describes the elements on the OCE Application Screen.

Function	Description
1. Tabs	Accesses other functions of OCE such as: • Home: Opens the Home Page. • Accounts: Lists all HCPs/HCOs. • Planner: Enables scheduling calls and events. • CLM: Opens Closed Loop Marketing (CLM) Presentations. • Reports: Opens the Reports screen, where you can view information. • Orders Dashboard: Shows the status of existing orders. • Medical Inquiries: Lists the Medical Inquiry requests. • Meetings: Opens the Meetings screen, where you can manage your meetings. • Coaching Events: Opens the Coaching screen where you can manage your coaching activities.
2. Next Best Customer	Lists the 5 next Best Customers to visit, based on criterias defined by the Administrator.
3. Dashboards	Displays the charts that depict important data specific to the territory.
4. Recent Activity	Shows the history of actions performed by the user during his session: including Calls, Account, CLM (Closed Loop Marketing), Orders, and Medical Inquiries.
5. User Icon/ Settings Icon	Gives you access to other functionality such as Change Territory and Synchronization.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- **Home Page Elements**
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

HOME PAGE ELEMENTS

The table below describes the sections on the OCE Home Page:

Section	Description
Next Best Customer Top 5 Ranked List	Lists the Top 5 best Account To call on, ranked by the Ada Light engine.
Top 5 NBC	Shows the Top 5 best Accounts to call on, based on Ada Light engine, and including POA info.
Up Next	Displays your agenda for the next few days, such as planned calls, meetings, and time off territory.
Call Plan	Displays your status in achieving your Call Plan goal for the current cycle period.
Unsubmitted Calls	Shows a list of your unfinished calls.
Sales Chart	Shows a territory-level summary of sales data for products.

Notes:

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- **Home Page Elements**
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

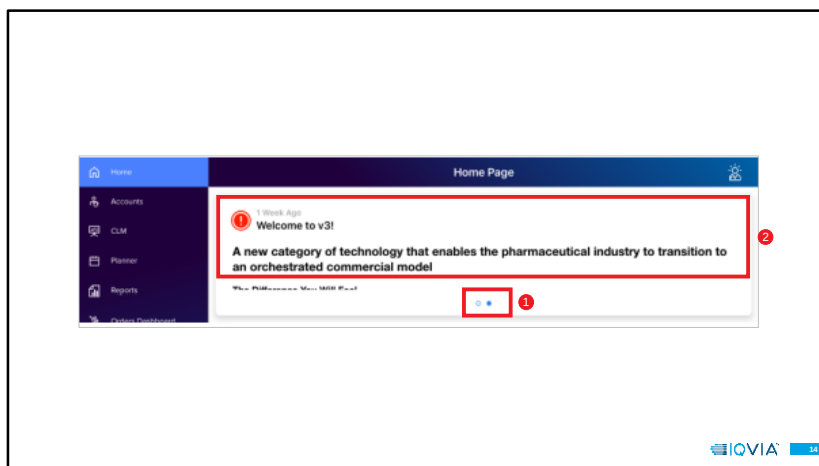

HOME PAGE ELEMENTS

Section	Description
Additional Charts	Additional charts that are configured by an application administrator are displayed on the Home Page, such as Average calls per day (weekly), Target Coverage Report, Calls per Month by Channel, and Call Plan Attainment by Specialty.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- **Home Office Messages**
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

MESSAGES

*If messages are displayed on your **Home Page**, you can preview messages sent by an application administrator and view the full details of messages.*

*On **Home Page**:*

Step	Action
1	If there are more messages, dots are displayed below the message preview. To go to the next or previous message, swipe left or right.
2	Tap a message to view the complete message.

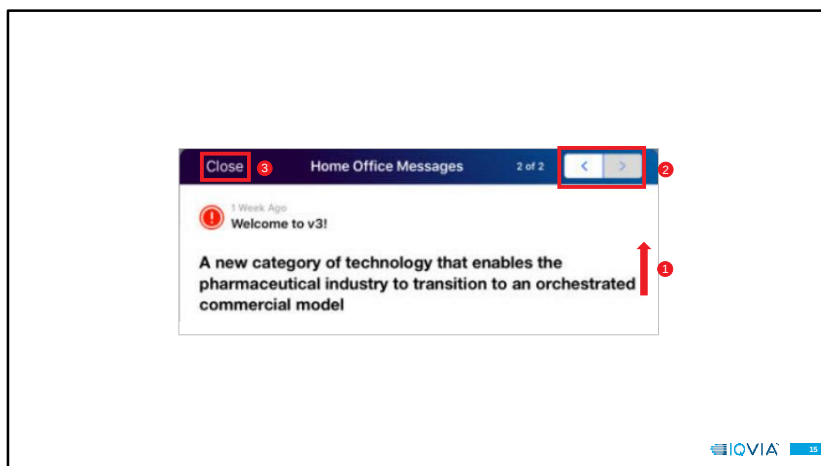

TIP:

An application administrator can flag a message with an Alert icon , a Message icon , or no icon. A message disappears automatically after its expiration date, if it has one. Otherwise, it remains until the application administrator deactivates it or stops sharing it.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- **Home Office Messages**
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

MESSAGES

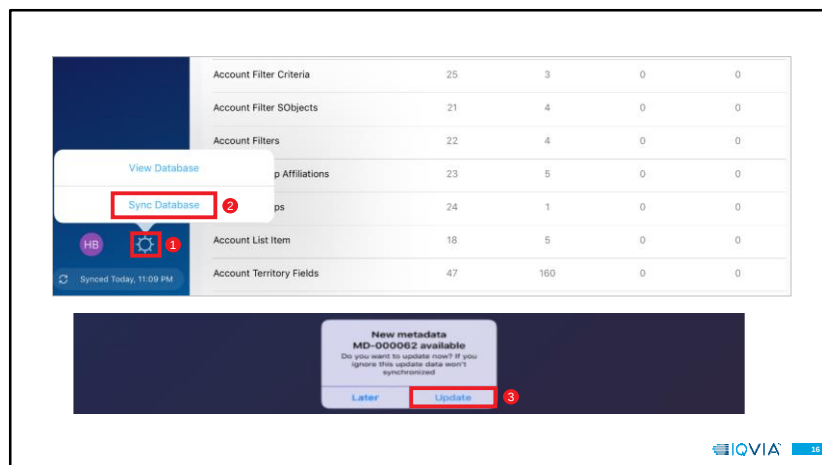

For a full message:

Step	Action
1	Swipe up to see more of a long message.
2	Tap an arrow in the upper-right corner to go to the next or previous message.
3	Tap Close to return to the Home Page .

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- **Synchronization**
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

SYNCHRONIZATION

The following types of synchronization are available in the OCE app:

- **Full Sync:** Downloads all data and metadata from the server to a mobile device, and uploads usage data to Salesforce (transactions, logs, statistics).
- **Delta Sync:** Synchronizes data that has been updated or changed since the last sync, updating the database schema as needed.
- **Upload Only:** Synchronizes from a mobile device to Salesforce. This is the one-way uploading of usage data (transactions, logs, statistics), and does not download data or metadata.

SYNCHRONIZE DATA

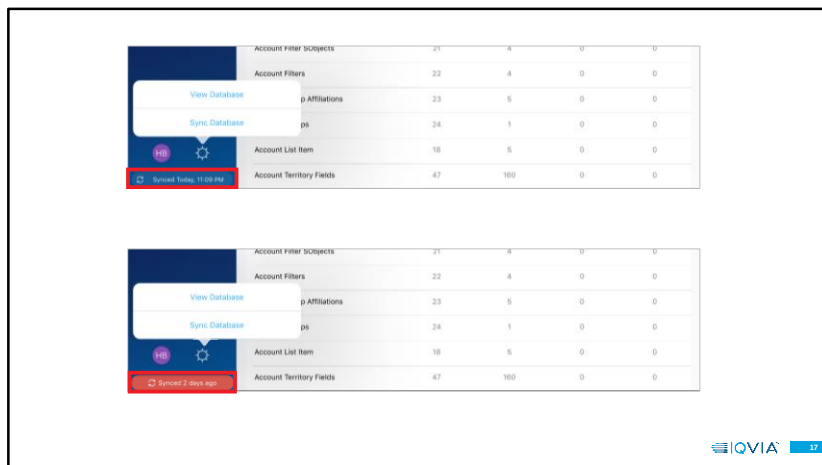

Synchronizing the database allows for the application to reflect the most current data available. Data can be synchronized when the user chooses or after being prompted by a system notification.

Step	Action
1	Tap the Settings icon in Control Panel to synchronize at any time. You can also sync the database when the system notifies you that new data is available.
2	Tap Sync Database .
3	Tap Update in the notification pop-up.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- **Synchronization**
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

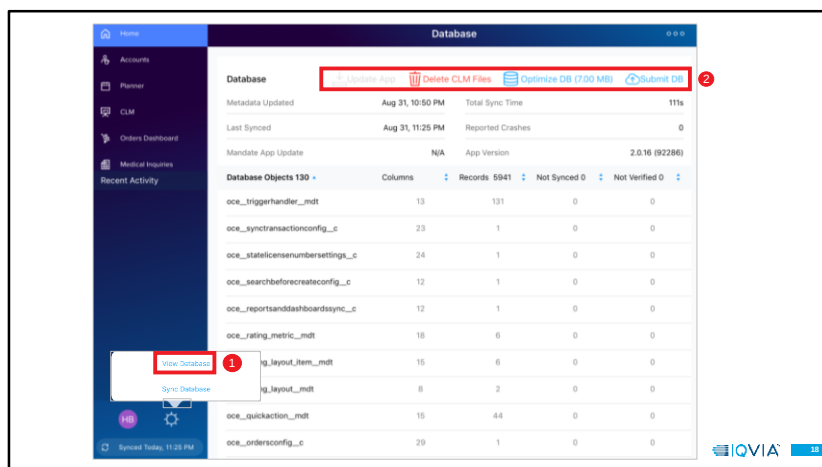

LAST SYNC DATE TIME

The Synchronization button indicates when the last synchronization occurred. If it is red, synchronization has not occurred within the last 24 hours. Tap the button to synchronize.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- **View Database**
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

VIEW DATABASE

After synchronizing data, you can view a summary of the update. This can provide insights into the magnitude and frequency of changes.

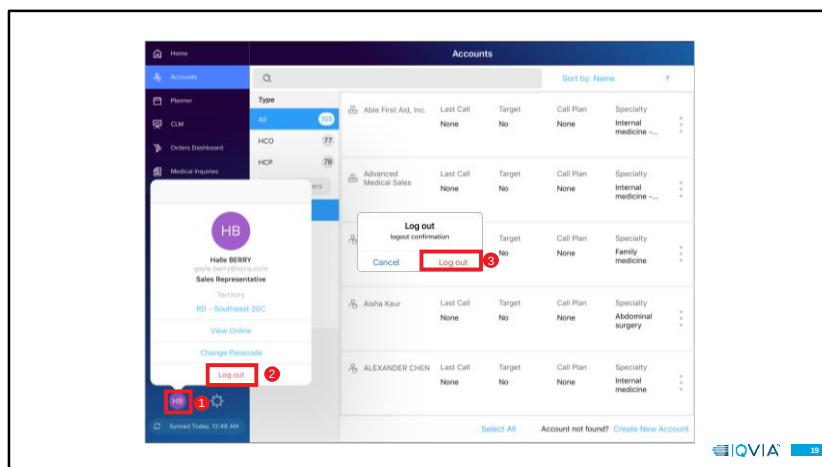

Notes:

Step	Action
1	Tap the Settings icon and select View Database to open a synchronization summary.
2	Links at the top of the summary allow you to: • Update App: updates the application if the new version is available. The button is active only if a new app version is available. • Optimize DB: cleans up the unused space in the offline DB. • Submit DB: submits your current database to support for debug/research purposes.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- **Log Out**
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

LOG OUT

To exit the application, it is recommended you close the application without logging out. This will ease the login process next time you access OCE by requiring only your passcode to enter the application.

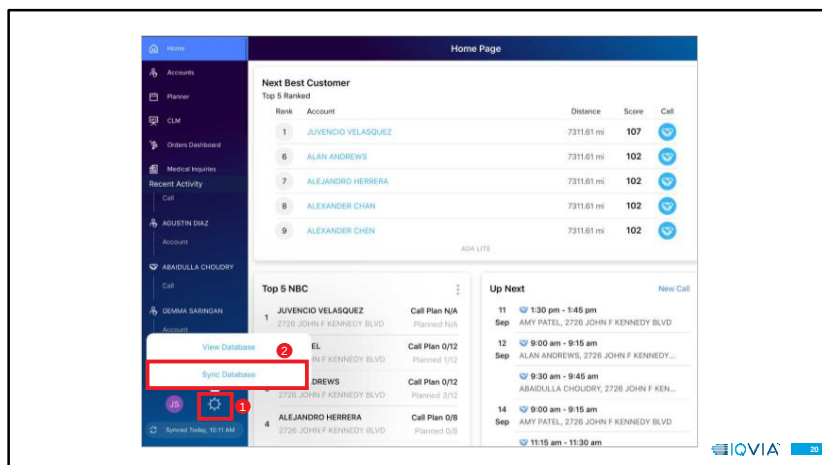

However, there will be times when you will need to log out of the application.

Step	Action
1	Tap the User Account icon.
2	Tap Log Out .
3	Tap Log Out to confirm.

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- **Manually Synchronizing**
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

MANUALLY SYNCHRONIZING

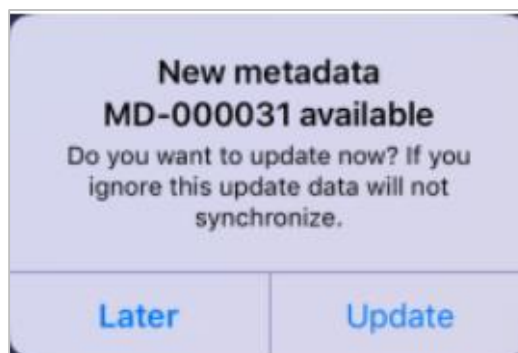

You can manually initiate the synchronization process.

To manually synchronize metadata and data:

Step	Action
1	Tap the Tools icon in the lower left corner of the screen.
2	Tap Sync Database .

UPDATING THE METADATA

Metadata is synchronized during login. If you are logged in and a new version of metadata is available, a message is displayed.

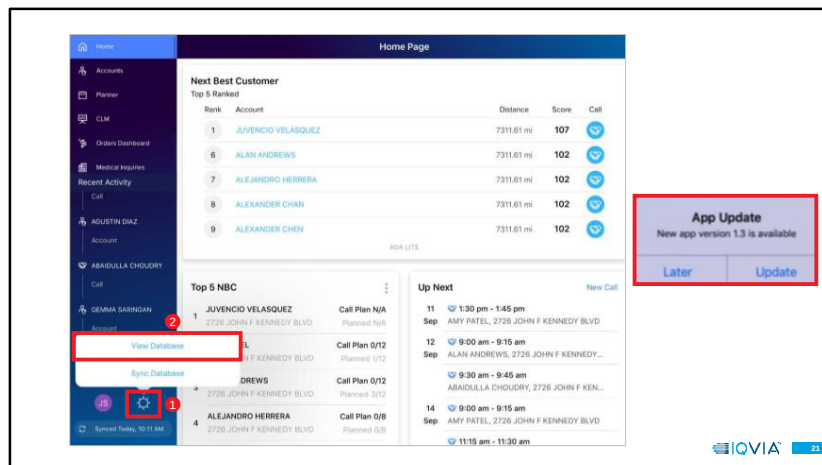

*Tap **Update** to accept the new metadata.*

*If you tap **Later**, you can manually synchronize the database to update the metadata in the application.*

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

MANUALLY UPDATING THE APPLICATION

If a new version of the application is available, and you tapped Later to postpone the update, you can manually update the application.

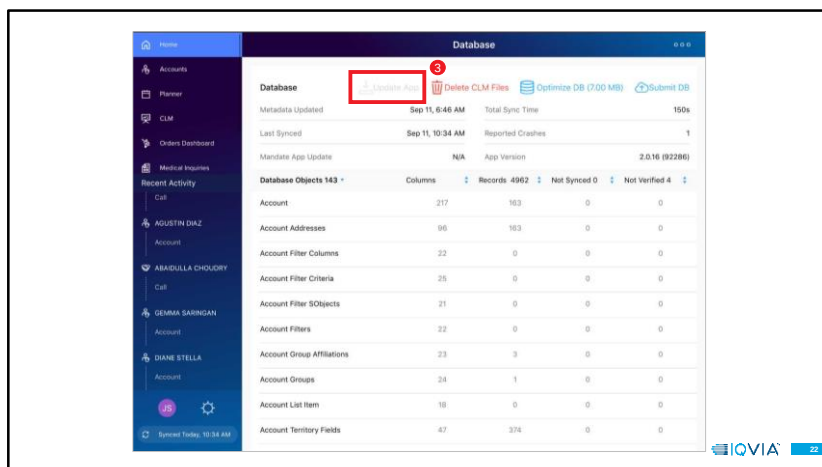

To manually update the application:

Step	Action
1	Tap the Tools icon in the lower left corner of the screen.
2	Tap View Database .

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

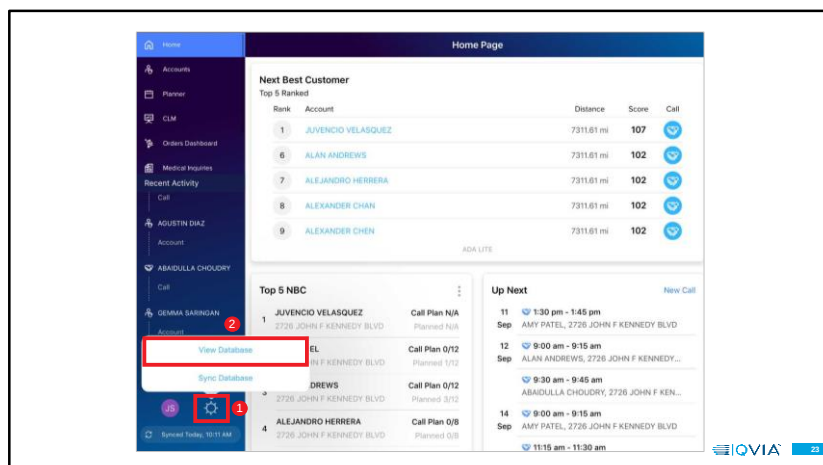

MANUALLY UPDATING THE APPLICATION

Step	Action
3	Tap Update App .

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

OPTIMIZING THE DATABASE

You can optimize the size of the local database to free up unused database space.

To optimize the size of the local database:

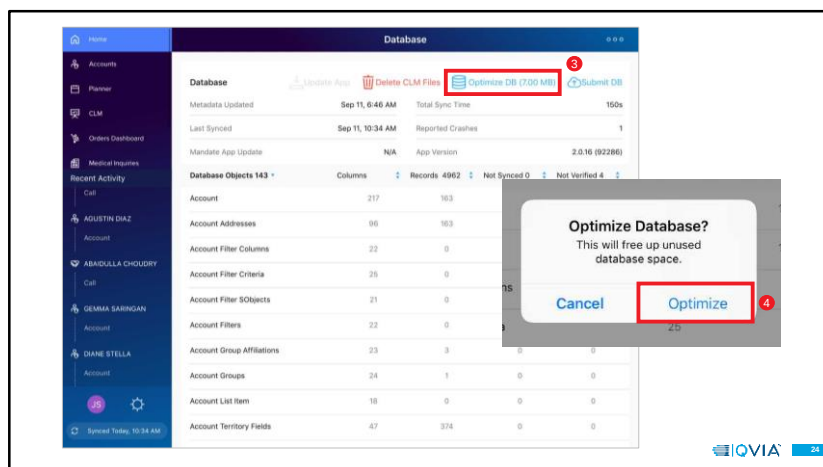

Step	Action
1	Tap the Tools icon in the lower left corner of the screen.
2	Tap View Database .

Notes:

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

Notes:

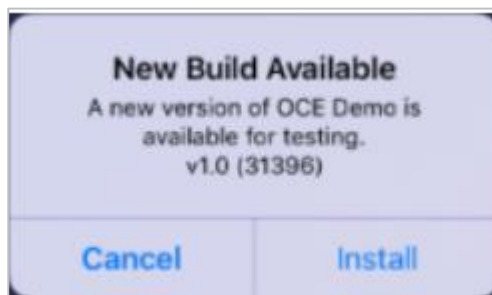

OPTIMIZING THE DATABASE

Step	Action
3	Tap Optimize DB .
4	Tap Optimize .

UPDATING THE BUILD

If a new build of application is available, a message is displayed.

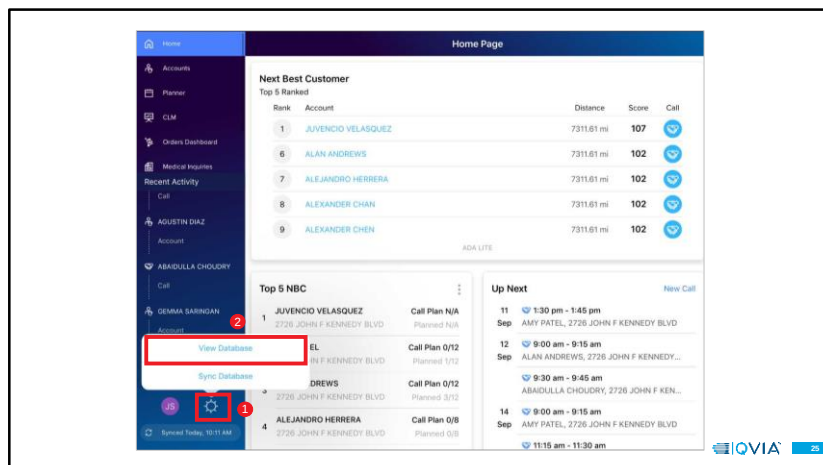

*Tap **Install** to accept the new build.*

*If you tap **Cancel**, the message is displayed again the next time you open the application.*

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

SUBMITTING THE DATABASE

You can upload your current database if it needs to be researched for support.

To submit the local database:

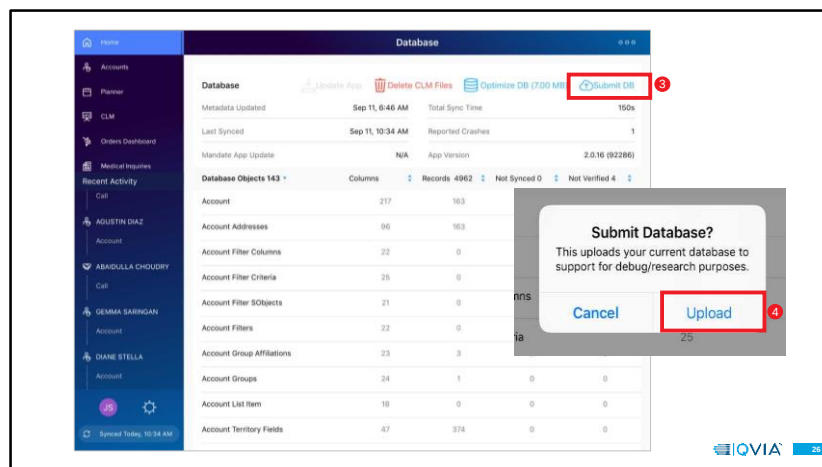

Notes:

Step	Action
1	Tap the Tools icon in the lower left corner of the screen.
2	Tap View Database .

GETTING STARTED

- Log in to OCE
- Reset Password
- Set and Change Passcode
- Select Territory
- Switch Territory
- Set Language
- Application Screen
- Home Page Elements
- Home Office Messages
- Synchronization
- View Database
- Log Out
- Manually Synchronizing
- Manually Updating the Application
- Optimizing the Database
- Submitting the Database

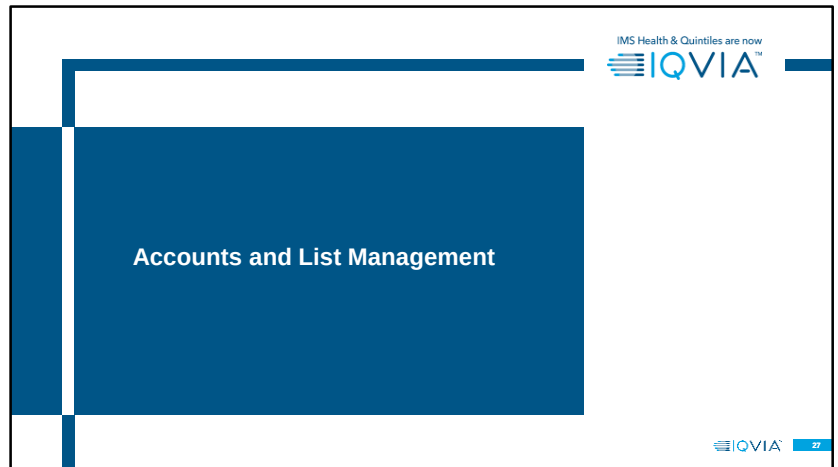

Notes:

SUBMITTING THE DATABASE

Step	Action
3	Tap Submit DB .
4	Tap Upload. After the database is submitted, a message is displayed. Tap Ok to close the message.

ACCOUNTS AND LIST MANAGEMENT

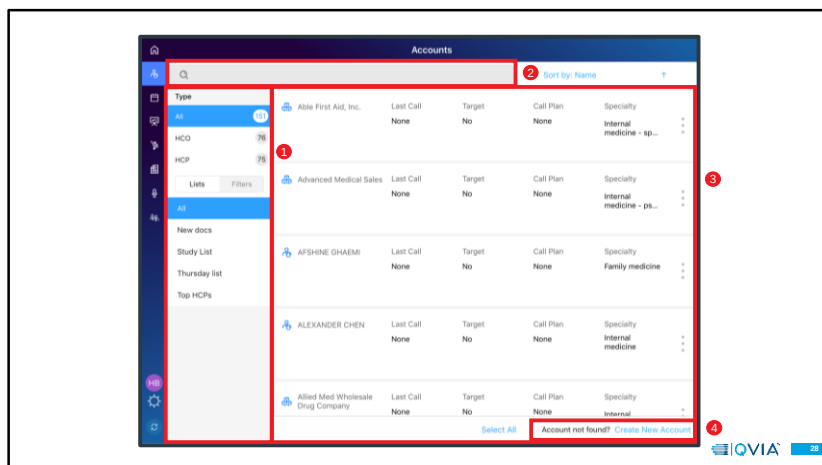

SECTION TOPICS:

- Accounts Tab
- Filter Accounts
- Search Accounts
- Lists and Filters
- Manage Lists
- Export a List of Accounts
- Share a Filter
- Manage Filters
- Bulk Update

Notes:

ACCOUNTS AND LIST MANAGEMENT

- **Accounts Tab**
- Filter Accounts
- Search Accounts
- Lists and Filters
- Manage Lists
- Export a List of Accounts
- Share a Filter
- Manage Filters
- Bulk Update

ACCOUNTS TAB

You can easily access your account information once you have logged in and uploaded your database onto your device.

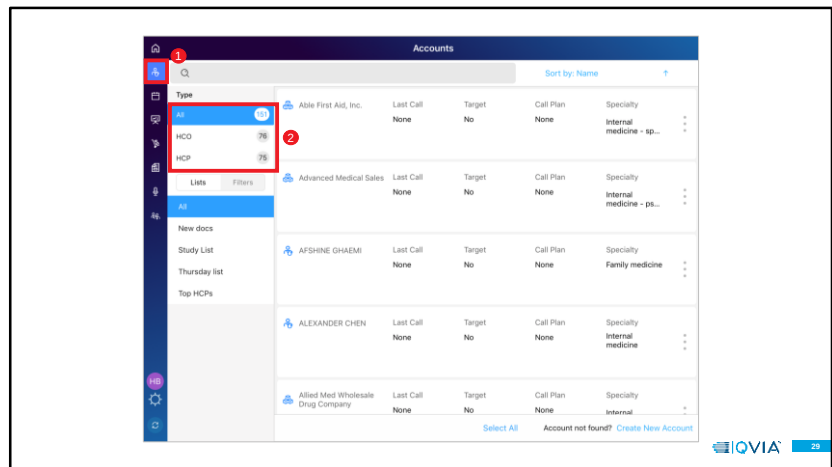

Below the Home icon on the Left Navigation pane is the icon for Accounts, where you can filter, search, and access HCP and HCO accounts.

Notes:

Area	Description
1. Account Type	Filters by Account type (HCPs/HCOs by default).
2. Search Field	Find specific accounts.
3. Account Details	Shows lists of Accounts based on selected criterias.
4. Create New Account	Add new Account Profiles .

ACCOUNTS AND LIST MANAGEMENT

- Accounts Tab
- **Filter Accounts**
- Search Accounts
- Lists and Filters
- Manage Lists
- Export a List of Accounts
- Share a Filter
- Manage Filters
- Bulk Update

FILTER ACCOUNTS

There are a number of ways to filter the accounts displayed on the account page.

You can filter by:

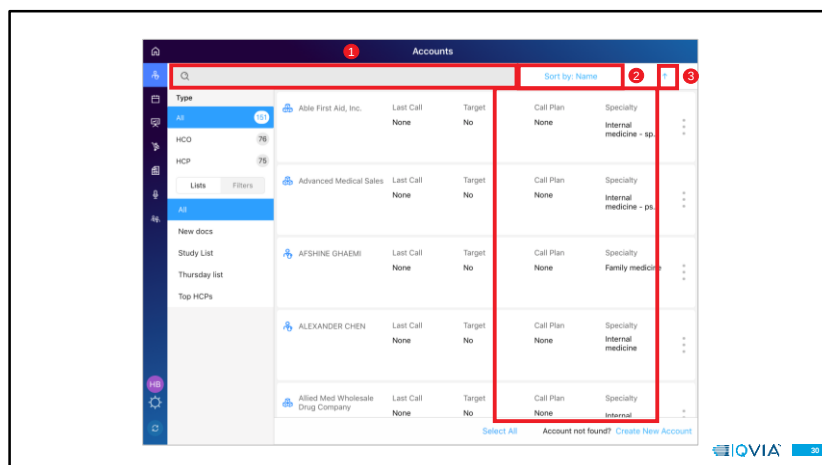

- Account Type (HCP, HCO)
- Search Criteria
- Designated Lists
- Filters

Notes:

Step	Action
1	Tap Accounts on the primary navigation bar to access the list of account records.
2	Tap one of the following categories to segment the list by account type: • All: Both HCPs and HCOs • HCO: Health Care Organizations (HCOs) • HCP: Health Care Providers (HCPs)

ACCOUNTS AND LIST MANAGEMENT

- Accounts Tab
- Filter Accounts
- **Search Accounts**
- Lists and Filters
- Manage Lists
- Export a List of Accounts
- Share a Filter
- Manage Filters
- Bulk Update

SEARCH ACCOUNTS

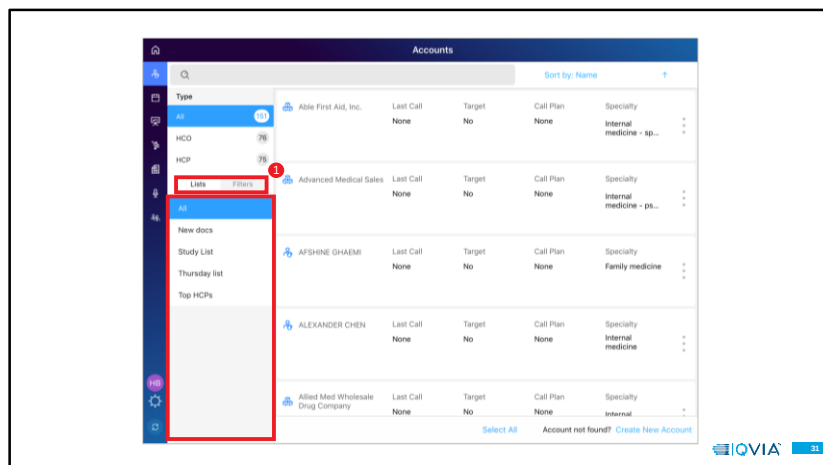

The Search field allows you to search for account in your TERRITORY. The System returns results that contain the constraints in the Name fields, Address Fields, or specialty.

Notes:

Step	Action
1	Type keyword, name, or portion of either into the Search field. <u>Note.</u> If you need an exact match you must enter the entire word. If you want to search for multiple criteria, enter your first criterion and hit Search, then enter you next criterion.
2	Tap Sort and select a data field from the drop-down by which to sort the list.
3	Tap the arrow to sort by ascending or descending order. Tap again to sort in reverse order. This is a toggle link, which means that if the search results are already sorted in ascending order, they will be sorted in descending order on tapping the link. However, if they are sorted in descending order, they will be sorted in ascending order on tapping the link.

LISTS AND FILTERS

OCE allows you to create account lists to help you better manage your data.

There are two types of lists:

- **List:** A static list of accounts created to segregate providers into a group.
- **Filter:** Dynamic lists created based on criteria. If the value of criteria changes, the results of the Filter list are automatically updated.

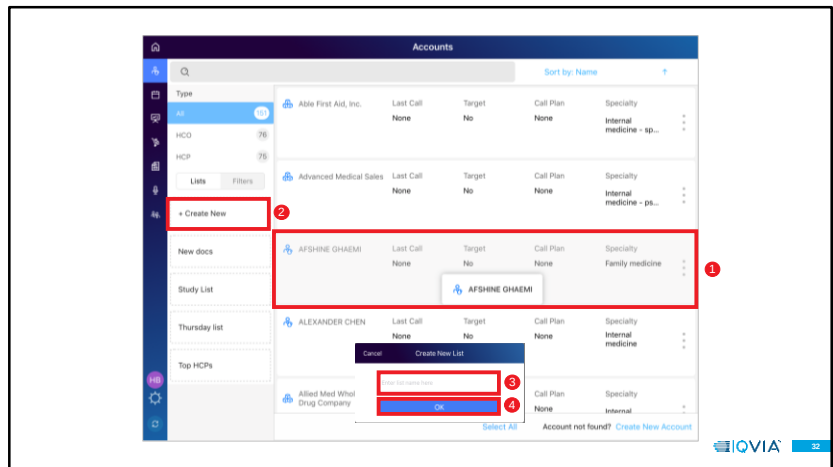

Saved Lists and filters

Step	Action
1	Toggle between Lists and Filters to display the desired data.

Notes:

ACCOUNTS AND LIST MANAGEMENT

- Accounts Tab

- **Manage Lists**
- Export a List of Accounts
- Share a Filter
- Manage Filters
- Bulk Update

CREATE A NEW LIST

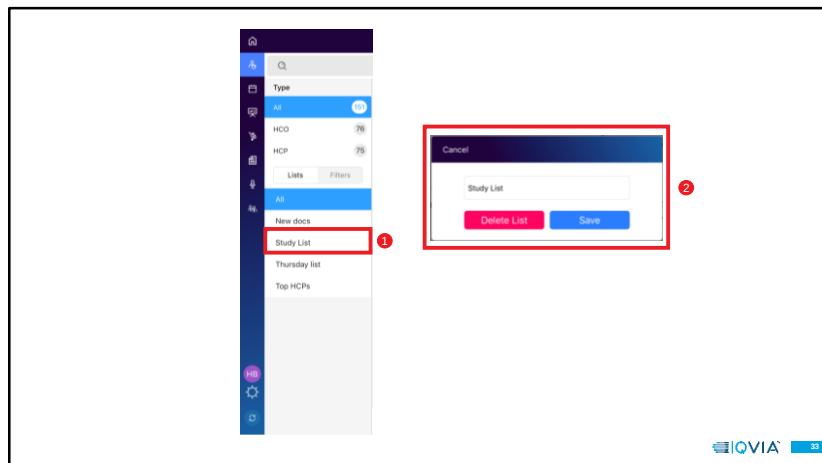

Lists in OCE allow you to create a static grouping of accounts that you can use for viewing your data.

Notes:

Step	Action
1	Tap and hold on any account in the Account list.
2	Drag the account icon to the + Create New field on the left.
3	Type the list name of the new list in the Create New List pop-up.
4	Tap OK .

ACCOUNTS AND LIST MANAGEMENT

- Accounts Tab
- Filter Accounts
- Search Accounts

EXPORT A LIST OF ACCOUNTS

You can export the results of a static list or filter list of accounts to a csv file that you can copy, save, or email, so you can work with the list outside the OCE Sales app.

To export a list of accounts:

Notes:

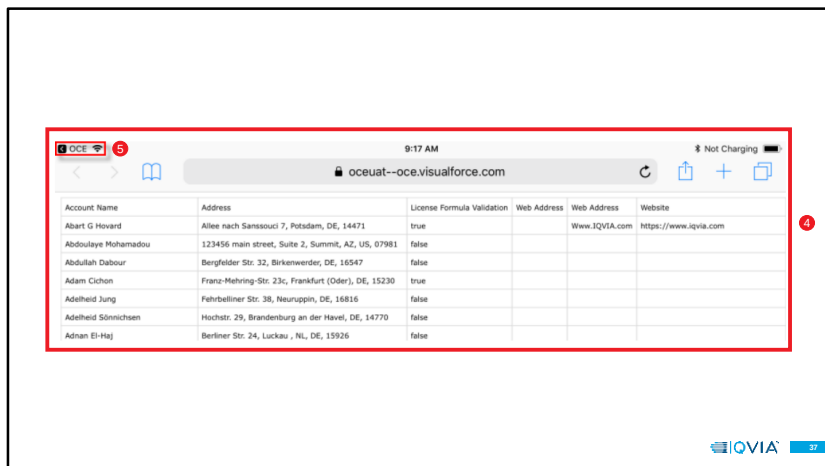

Step	Action
1	Tap Accounts .
2	Select a list or filter to display the accounts you want to export.
3	Tap Export List at the bottom of the screen.

NOTE:

An application administrator must enable the export accounts feature and you must have an Internet connection to use it.

ACCOUNTS AND LIST MANAGEMENT

EXPORT A LIST OF ACCOUNTS

You can export the results of a static list or filter list of accounts to a csv file that you can copy, save, or email, so you can work with the list outside the OCE Sales app.

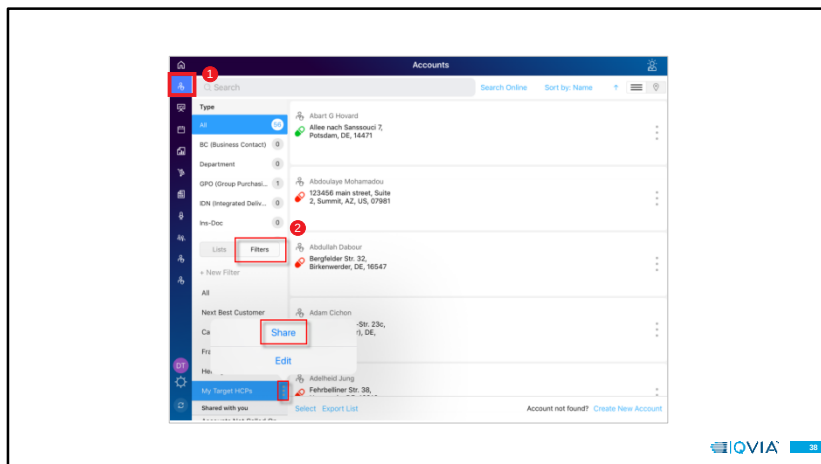

To export a list of accounts:

Notes:

Step	Action
4	The csv file opens in a web browser, and you can use your web browser functions, such as copy, save, or email.
5	Tap OCE in the upper-left corner to return to the app when you are finished.

ACCOUNTS AND LIST MANAGEMENT

- Accounts Tab
- Filter Accounts
- Search Accounts
- Lists and Filters
- Manage Lists
- Export a List of Accounts
- **Share a Filter**
- Manage Filters
- Bulk Update

SHARE A FILTER

To share a custom filter:

Step	Action
1	Tap Accounts .
2	Tap Vertical Dots for the filter you want to share and select Share .

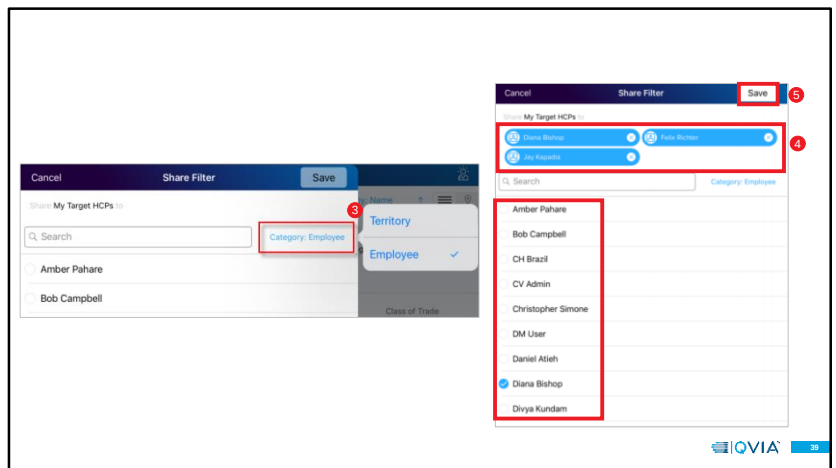

NOTE:

You must have an Internet connection to share a filter. If you just created a filter, you must sync before you can share it.

Notes:

ACCOUNTS AND LIST MANAGEMENT

- Accounts Tab
- Filter Accounts
- Search Accounts

- Manage Lists
- Export a List of Accounts
- **Share a Filter**
- Manage Filters
- Bulk Update

SHARE A FILTER

To share a custom filter:

Step	Action
3	Tap Category and select whether to share to Employee or Territory. • Employee sharing stays with the employee even after a territory change. • Territory sharing stays with the territory, and it is available to whomever is currently assigned to the territory. If someone leaves the territory, the filter will no longer be available to them.
4	Tap recipients to select them. They are added at the top of the screen.
5	Tap Save to share the filter.

TIP:

To find an employee or territory by name, type in **Search**. To remove a recipient, tap **Remove** or clear the selection in the list.

Notes:

Notes:

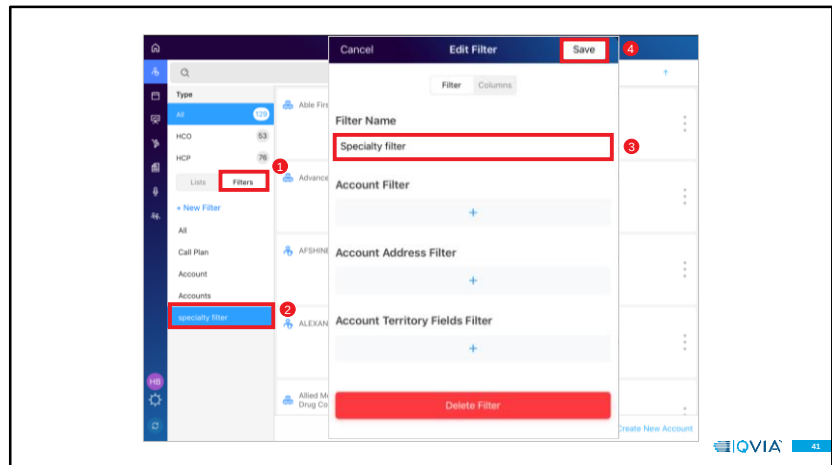

CREATE A NEW FILTER

Filters are a way of creating dynamic lists that contain accounts that meet specific criteria. They can be used to view changes in your accounts, such as accounts that may be marked as designated speakers for specific programs throughout the year.

Step	Action
1	Tap Filters .
2	Tap + New Filter .
3	Enter a Filter Name then add the desired constraints. You can use Account Fields , Account Address Fields , and Account Territory Fields to create the filter.
4	Tap + below the category of filter you want to use to add the filter.
5	Select a Field then select an operator (such as Equals , Not equal to , Contains , Does not contain).
6	Select the value of the selected field that you want to see in your results.
7	Tap Save .
8	Tap the Columns toggle to select what you want to see in the list results. <u>Note</u> : Only the first four will be displayed as columns in the Mobile application.
9	Tap Save .

Notes:

ACCOUNT SEARCH

- **Search for Accounts**
- Select Multiple Accounts
- Search for an Account Online and Download it

SEARCH FOR ACCOUNTS

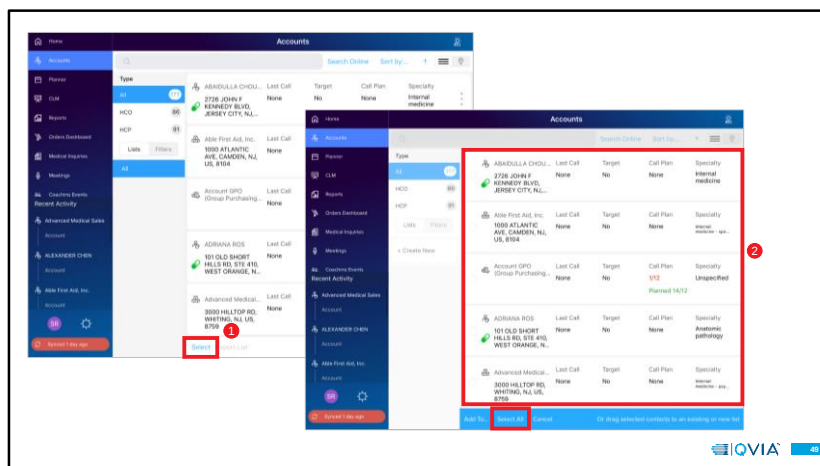

You can use the **Search** field and account **Type** filters, and sort the results to find an account. For this:

Notes:

Step	Action
1	Tap Accounts .
2	Enter a string of characters in Search and then tap the Search button on the keyboard to search for an account.
3	Tap an Account Type in the left pane to filter accounts based on type.
4	Tap Sort by and select a field to sort by to sort the results.

ACCOUNT SEARCH

- Search for Accounts
- **Select Multiple Accounts**
- Search for an Account Online and Download it

SELECT MULTIPLE ACCOUNTS

You can select multiple accounts and add them to create a group call, create a new static list or add them to a static list.

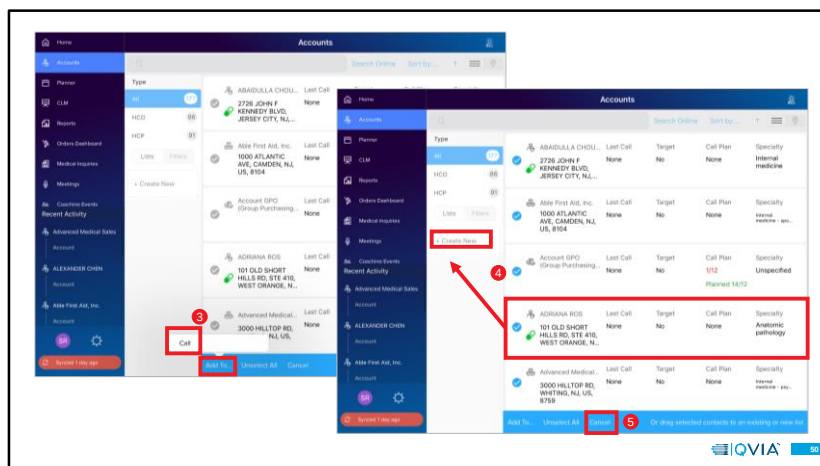

Notes:

To select multiple accounts:

Step	Action
1	Tap Select at the bottom of the screen.
2	Select multiple accounts individually or tap Select All to select all the accounts.

ACCOUNT SEARCH

- Search for Accounts
- **Select Multiple Accounts**
- Search for an Account Online and Download it

SELECT MULTIPLE ACCOUNTS

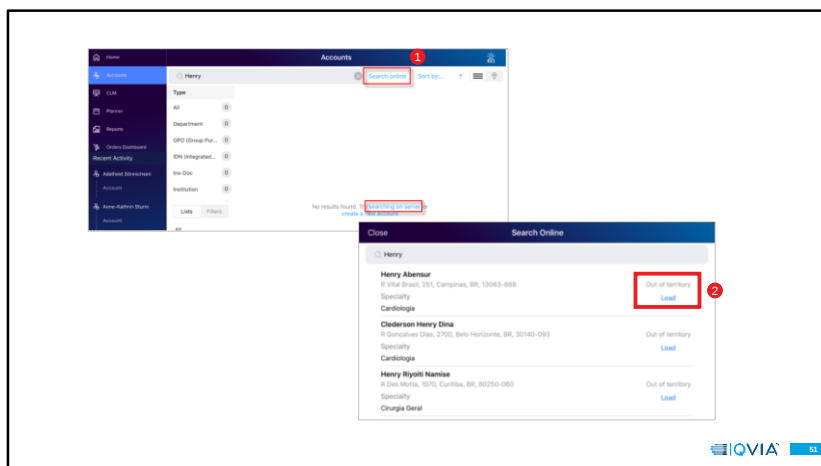

To select multiple accounts:

Notes:

Step	Action
3	Tap Add To at the bottom of the screen and then select Call to create a call.
4	You can tap and hold a selected account and then drop it to the Create New box to create a list.
5	Tap Cancel at the bottom of the screen when you finish.

ACCOUNT SEARCH

- Search for Accounts
- Select Multiple Accounts
- Search for an Account Online and Download it

SEARCH FOR AN ACCOUNT ONLINE AND DOWNLOAD IT

If an application administrator enabled Search on Server in your app, if you can't find an account in your local database and you have an Internet connection, tap Search online to search for the account in the Salesforce database. If you find the account in Salesforce, you can download it.

To search the server, download, and self-align an account:

Step	Action
1	Tap Search Online or Search on Server if you search for an account and don't find it in your local database.
2	Search for the account online. • If you find the account in Salesforce and it's Out Of Territory, tap Load to self-align the account and download it to your local database. If you download an Out of Territory InsDoc, the related HCO and HCP are also aligned and downloaded.

TIP:

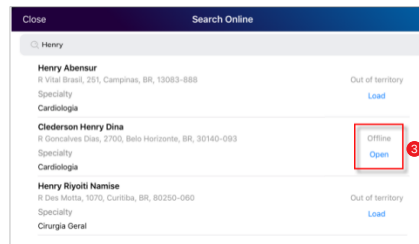

If you find the account in Salesforce and it's **In Territory**, tap **Load** to download it to your local database.

If no results are found on the server, you can tap **Create New Account** to create a new profile.

Notes:

ACCOUNT SEARCH

- Search for an Account Online and Download it

SEARCH FOR AN ACCOUNT ONLINE AND DOWNLOAD IT

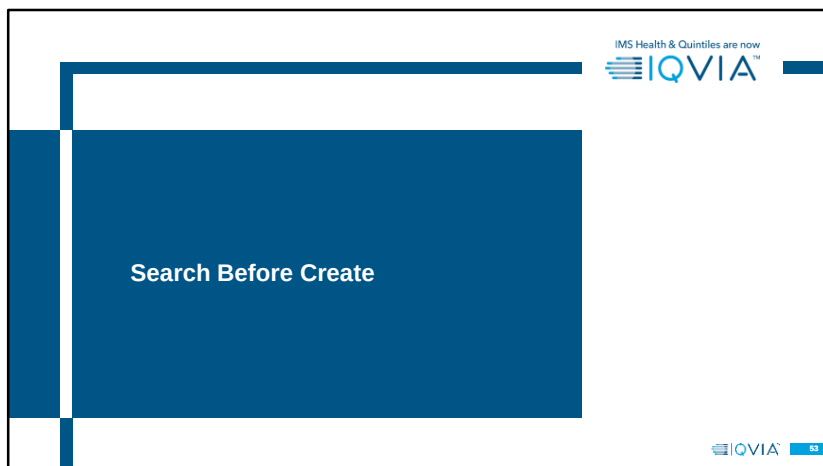

If an application administrator enabled Search on Server in your app, if you can't find an account in your local database and you have an Internet connection, tap Search online to search for the account in the Salesforce database. If you find the account in Salesforce, you can download it.

To search the server, download, and self-align an account:

Step	Action
3	After the account is downloaded, tap Open to go to the offline profile of the account.

Notes:

Search Before Create

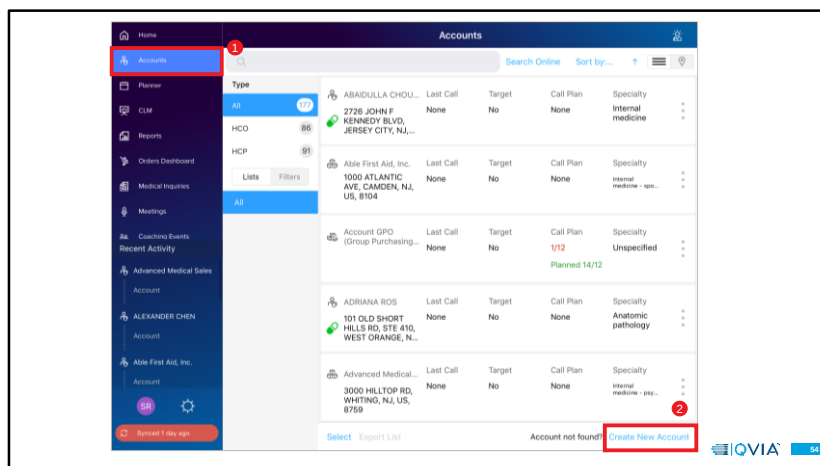

SECTION TOPICS:

- Create a Profile for a New Account

Notes:

SEARCH BEFORE CREATE

- Create a Profile for a New Account

CREATE A PROFILE FOR A NEW ACCOUNT

If a profile doesn't exist for a new account, you can create one. If Search Before Create is enabled in your app, before a profile is created, the system searches to see if the profile might already exist in your local database. If you have an Internet connection, it also searches for potential matches in the Salesforce universe.

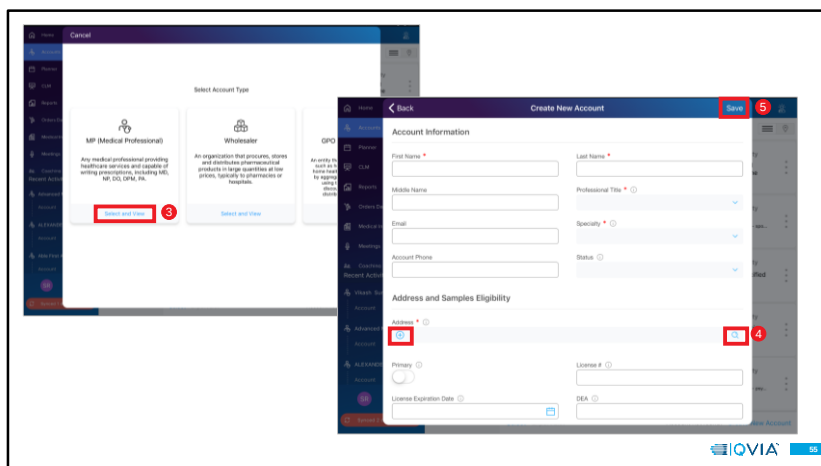

Notes:

To create a profile for a new account:

Step	Action
1	Tap Accounts .
2	Tap Create New Account .

SEARCH BEFORE CREATE

- Create a Profile for a New Account

CREATE A PROFILE FOR A NEW ACCOUNT

To create a profile for a new account:

Notes:

Step	Action
3	Swipe to find the type of account you want to create and then tap Select and View .
4	Enter information for the new account. To enter an address, either: • Select an existing address by tapping Search. • Create a new address by tapping Add.
5	Tap Save .

SEARCH BEFORE CREATE

- Create a Profile for a New Account

CREATE A PROFILE FOR A NEW ACCOUNT

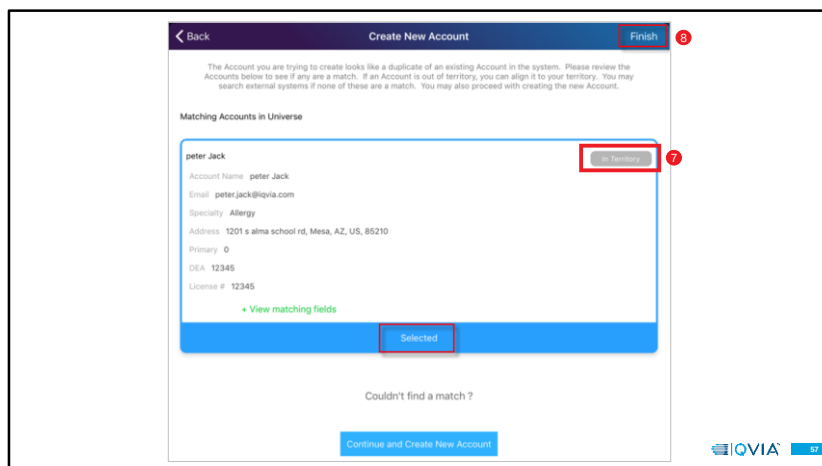

To create a profile for a new account:

Step	Action
6	If Search Before Create isn't enabled in your app, the account profile is created. If Search Before Create is enabled and no potential matches are found, the account profile is created. If potential matches are found, they are listed.

Notes:

SEARCH BEFORE CREATE

- Create a Profile for a New Account

CREATE A PROFILE FOR A NEW ACCOUNT

To create a profile for a new account:

Step	Action
7	If the account is found and it's In Territory/Out of Territory , you can align it to your territory and download it. Tap Select and Download (so it's Selected).
8	Tap Finish .

Notes:

SEARCH BEFORE CREATE

- Create a Profile for a New Account

The Account you are trying to create looks like a duplicate of an existing Account in the system. Please review the Accounts below to see if any are a match. If an Account is out of territory, you can align it to your territory. You may search external systems if none of these are a match. You may also proceed with creating the new Account.

ACCOUNT PROFILES

When you open the Accounts tab, a listing of providers displays in alphabetical order by name.

From this view, you can see a high-level view of this account's important information "to" The Accounts tab shows a list of providers alphabetically. Information displayed here is client specific.

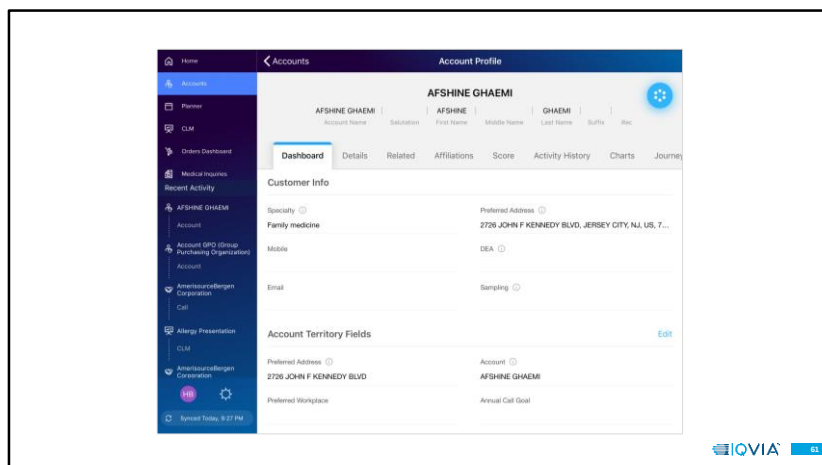

- **Account icon:** Displays the type of account this record applies to; HCP or HCO.
- **Account's Name and Address:** Displays the Primary Address for this account.
- **Last Call:** Displays the date and time of the last call on the account.
- **Specialty:** Displays the specialty designation in OCE for this account.
- **Pill icon:** Displays the status of the provider's state license. Accounts having a green pill icon have a valid state license and are sample eligible. Red pill icons indicate there is no valid state license on file and are not sample eligible.

By tapping on the account information on the Accounts tab, you can access their full profile.

Notes:

Data Change Request (DCR) Validation

To maintain the quality of information for accounts, Data Change Request (DCR) validation is required for:

- The creation of a profile for a new account, a new account address, or a new affiliation
- A modification to a validated field in an account profile or for an account address

The validation can either be performed:

- **Externally:** By OneKey or another entity
- **Internally:** By a Home Office employee or administrator

DATA CHANGE REQUEST VALIDATION

To maintain the quality of information for accounts, Data Change Request (DCR) validation is required for:

- *The creation of a profile for a new account, a new account address, or a new affiliation; and*
- *The modification to a validated field in an account profile or for an account address.*

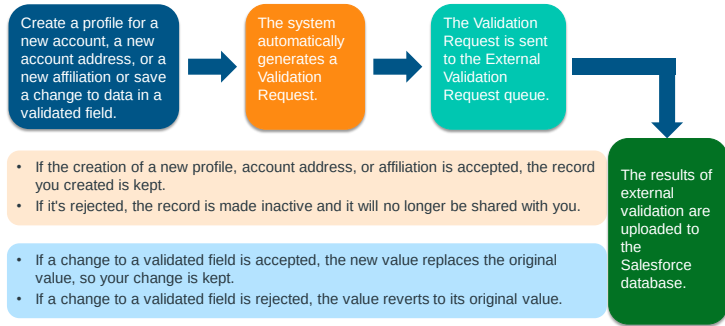

The validation can be performed by either of the following ways:

- **Externally:** By OneKey or another entity; or
- **Internally:** By a Home Office employee or administrator.

External DCR Validation

EXTERNAL DATA CHANGE REQUEST VALIDATION

External DCR Validation is a multistep process, which consists of the following steps:

1. *You create a profile for a new account, a new account address, or a new affiliation (with a role that requires validation) or save a change to data in a validated field, and the system automatically generates a Validation Request.*
2. *The Validation Request is sent it to the External Validation Request queue.*
3. *After the results of the external validation are uploaded to the Salesforce database:*
 - *If the creation of a new profile, account address, or affiliation is accepted, the record you created is kept (no change for you). If it's rejected, the record is made inactive and it will no longer be shared with you (unless an application administrator changed the sharing rules).*
 - *If a change to a validated field is accepted, the new value replaces the original value, so your change is kept. If a change to a validated field is rejected, the value reverts to its original value.*

TIPS

- If updates aren't seen immediately in your app, you see the updated value after synchronization.
- If updates are seen immediately in your app, after synchronization, you'll see the original value (you'll no longer see the updated value).

Notes:

- Action Buttons

Notes:

External DCR Validation

An application administrator configures whether updated values are seen immediately in your app:

- If updates are seen immediately, you'll see the new value in the app after you save the change, but if the change is rejected, the data will revert to its original value.
- If updates aren't seen immediately, you won't see the new value in the app after you save it. You'll only see it after the change is approved. If it's rejected, you'll never see the updated value in the app.

EXTERNAL DATA CHANGE REQUEST VALIDATION

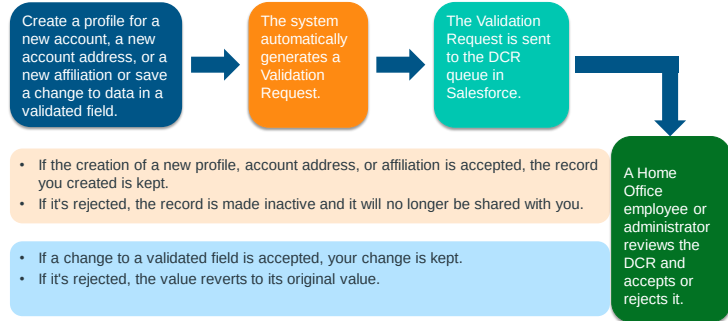

An application administrator configures whether updated values are seen immediately in your app:

- *If updates are seen immediately, you'll see the new value in the app after you save the change, but if the change is rejected, the data will revert to its original value.*
- *If updates aren't seen immediately, you won't see the new value in the app after you save it. You'll only see it after the change is approved. If it's rejected, you'll never see the updated value in the app.*

Internal DCR Validation

INTERNAL DATA CHANGE REQUEST VALIDATION

The Internal DCR Validation consists of the following steps:

- 1. Either you create a profile for a new account, a new account address, or a new affiliation, or you save a change to data in a validated field. The system automatically generates a Data Change Request (DCR) and sends it to the DCR queue in Salesforce.*
- 2. A Home Office employee or administrator reviews the DCR and accepts or rejects it.*
 - If the creation of a new profile, account address, or affiliation is accepted, the record you created is kept (no change for you). If it's rejected, the record is made inactive and it will no longer be shared with you (unless an application administrator changed the sharing rules).*
 - If a change to a validated field is accepted, your change is kept (no change for you). If it's rejected, the value reverts to its original value.*

TIP

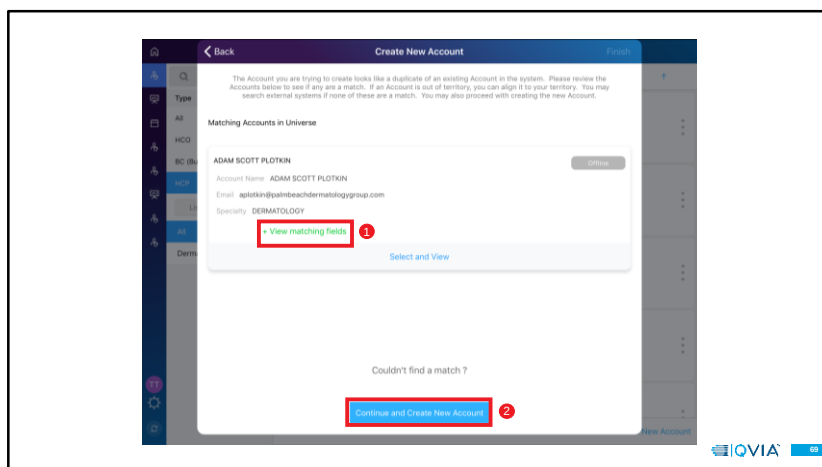

- Each time you save a change to a validated field, a DCR is created. If you edit a validated field and save and then edit a validated field and save it again, two DCRs are created.

PROFILE TABS

The following table lists the profile tabs. You can view and maintain account information from these tabs:

Tab	Description
Dashboard	View a high-level summary of key information about the account such as address and territory information.
Details	Shows detailed information about the account such as email and status of the account.
Related	Shows all of the addresses associated with the account. Tapping an address will bring up the address details where you can enter Best Times, Office Hours, and Appointment needed information.
Affiliations	Manages account's affiliations to locations (address-specific) and capture relationships between accounts.
Score	Shows the criteria that made up the score for this account.
Activity History	Shows history of all activities for this account. (Call, MIRF, Orders, Meetings, Journeys, etc.)
Charts	Displays summarized report information.
Journey Activity	Shows the list of OCE Marketing Journeys the HCP is enrolled in, and allows the Sales Representative to enroll the HCP to new journeys.
Ratings	Displays ratings associated with the account.

*In addition, the profile page shows the **Action Wheel/Buttons**.*

MODIFYING BEST TIMES FOR AN ACCOUNT ADDRESS

You can view and manage office hours, best times to call, and times an appointment is required at an address so you will have information about an account's availability when scheduling calls in Planner.

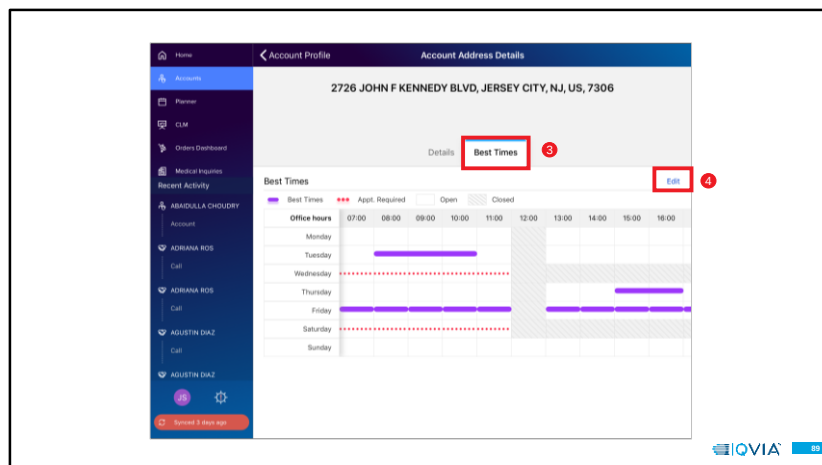

To manage best times for an account address:

Step	Action
1	Open the Related tab of the Account Profile.
2	Tap the address in the Account Addresses section.

MODIFYING BEST TIMES FOR AN ACCOUNT ADDRESS

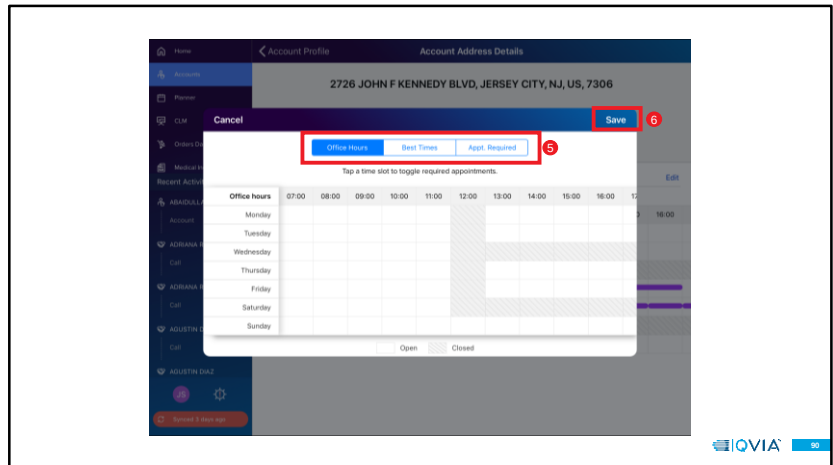

To manage best times for an account address:

Step	Action
5	Select Office Hours, Best Times, or Appt. Required on the edit screen to indicate the kind of information you want to update. • Tap and hold on the cell to change the value.
6	Tap Save when you are finished.

NOTE:

Best times and appointment required can be entered in a cell only during the business hours. You can't indicate the business is closed in a cell that's designated as best times, my best times, or appointment required. If you try to do this, the cell is highlighted in red, indicating it's not a valid entry.

TIP:

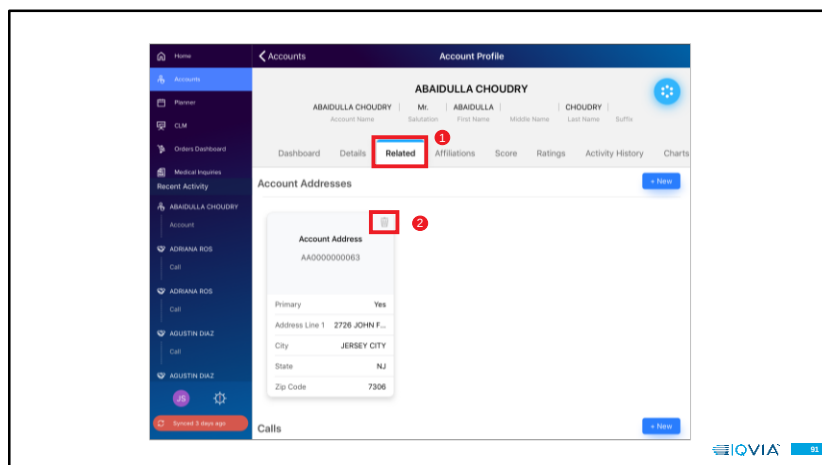

While still holding, swipe across the row to change values in multiple cells.

ROUTE BUILDER

In Planner, you can create routes of calls for accounts at the times and durations you routinely visit them in a day. Then you can apply a route to a day in Planner to create planned calls according to the route. Managers can share routes with employees. If a manager shares a route with you, you can use it to plan calls.

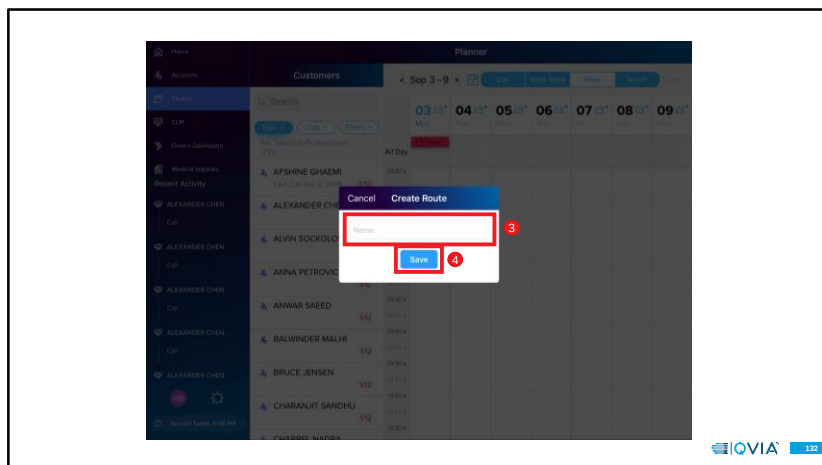

To create a route, use the Day, Work Week, or Week view in the Planner to create planned calls for the accounts at the times and for the durations you routinely visit them in a day. Then:

Step	Action
1	Tap Planner .
2	Tap Route for the day and then select Create/Update Route .
3	Enter a name for the route and tap Save .

Notes:

DISPLAY A ROUTE AND ASSIGN IT OR CREATE INDIVIDUAL CALLS

You can also create the call at a different address.

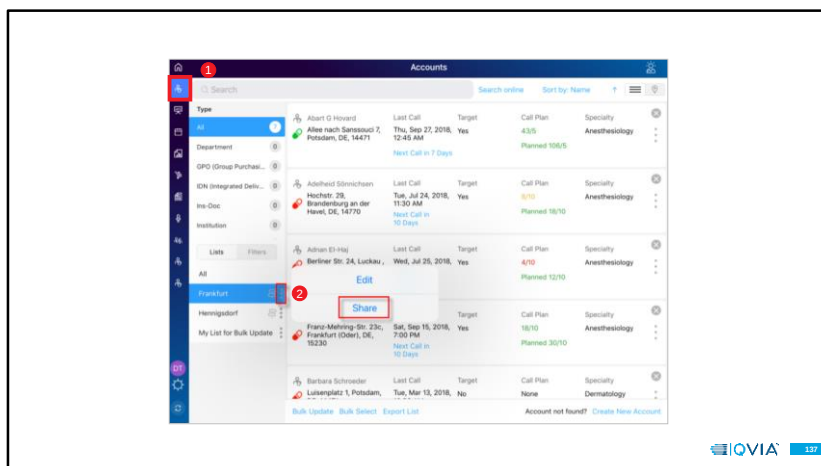

For this:

Notes:

Step	Action
4	Tap the account in the left pane to display addresses. Then, tap and hold an address and drag it to your schedule.

PLANNER

- Planner View
- General Event Handling
- Time Off Territory Handling
- Call Handling
- Call Preview
- Route Builder
- Apply a Route to Create Planned Calls
- Display a Route and Assign it or Create Individual Calls
- **Share a Route**
- Create a Meeting in Planner

SHARE A ROUTE

If you're a manager, you can share a route that you created with employees, so they can view it and use it to plan calls.

To share a route:

Step	Action
1	Tap Accounts .
2	Tap the vertical dots next to the route name and then tap Share .

TIP:

If someone shared a route with you, it is displayed in the **Shared with me** section. You can view it and use it to plan calls, but you can't share, modify, or delete it.

NOTE:

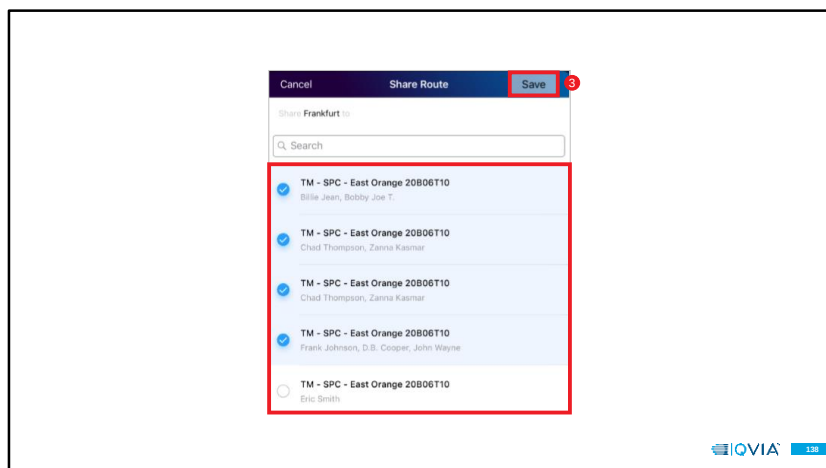

You must have an Internet connection to share a route. Also, if you just created a route, you must sync before you can share it.

Notes:

PLANNER

- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

CREATE A CALL FROM YOUR PLANNER

You can create a call from your planner.

Notes:

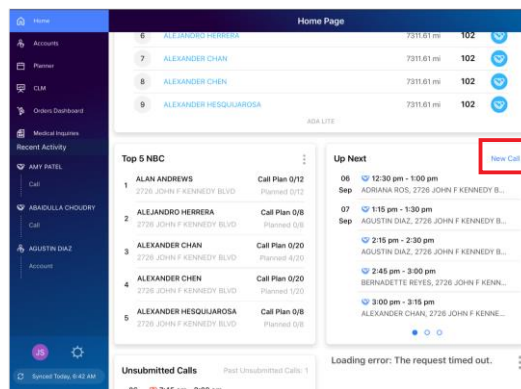

Step	Action
1	Go to Planner .
2	Find an account.
3	Drag and drop the account into the desired time on the calendar.

CREATE A CALL FROM NEXT BEST CUSTOMER

You can create a call from the Next Best Customer section on the Home page. To create a call from this section, tap Call next to the customer account.

CALLS

- Create a Call
- Open the Call Screen
- Call Form
- Call Elements
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

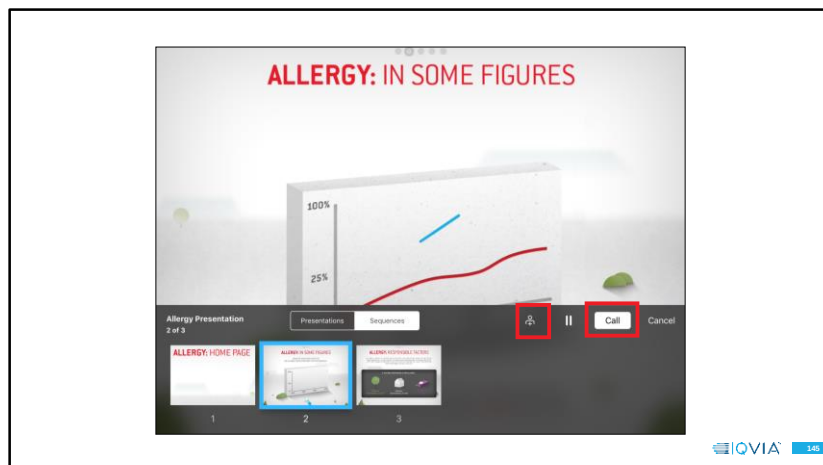

CREATE A CALL FROM THE UP NEXT SECTION

You can create a call from the Up Next section on the Home page. In the **Up Next** section on the **Home** page, tap **New Call**.

Notes:

CALLS

- **Create a Call**
- Open the Call Screen
- Call Form
- Call Elements
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

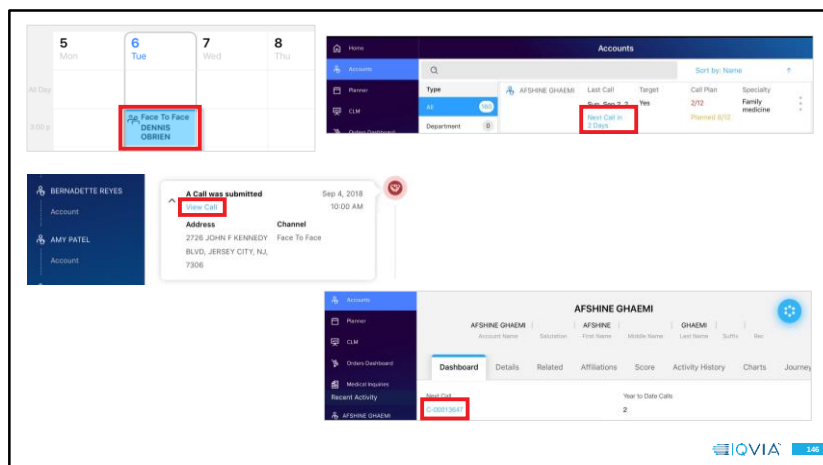

CREATE A CALL FROM THE CLM SCREEN

*Open a presentation in the CLM screen. Tap the bottom of the screen to view the hidden area. Use the **Add Attendee** icon to add at least one attendee and then tap **Call**.*

Notes:

CALLS

- Create a Call
- **Open the Call Screen**
- Call Form
- Call Elements
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

OPEN THE CALL SCREEN

There are several ways to open the call screen:

- In the **Planner** schedule, tap a call.
- In the **Accounts** screen, tap **Next Call** for a planned call.
- In the **Dashboard** tab of the Account Profile screen, scroll down to the **Account Territory Fields** section and then tap the link to the call.
- In the **Activity History** tab of the Account Profile screen, tap the link to view or finish the call.

When you open a call after creating it, the call form opens with the following fields pre-populated:

- **Account:** Information from the account record that was used to initiate a call.
- **Location:** The preferred address of account.
- **Date & Time:** The time and date of call.
- **Channel:** Defaults to Face to Face.
- **Status:** Defaults to Draft.
- **Territory:** Defaults to the current territory name.
- **Duration:** Defaults to the duration configured by the application administrator.

Notes:

CALLS

- Create a Call
- Open the Call Screen
- **Call Form**
- Call Elements
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

CALL FORM

The following sections may be displayed on the Call screen.

Section	Description
Menu	Attendees, Details, Samples, DTP, Items, and Expenses panels are added to the call form if they are selected in this menu.
Buttons	You can capture signatures as well as save or submit details related to your call.
Call Header	Contains details about your account and the call itself. The account's preferred account address is displayed. The account's sample eligibility for the location is displayed here.
Next Call Objectives	Enables you to save notes for the next call. After a call is submitted these notes will be displayed as Pre Call Objectives for the next call on the same territory. This may be a text field or a pick list.

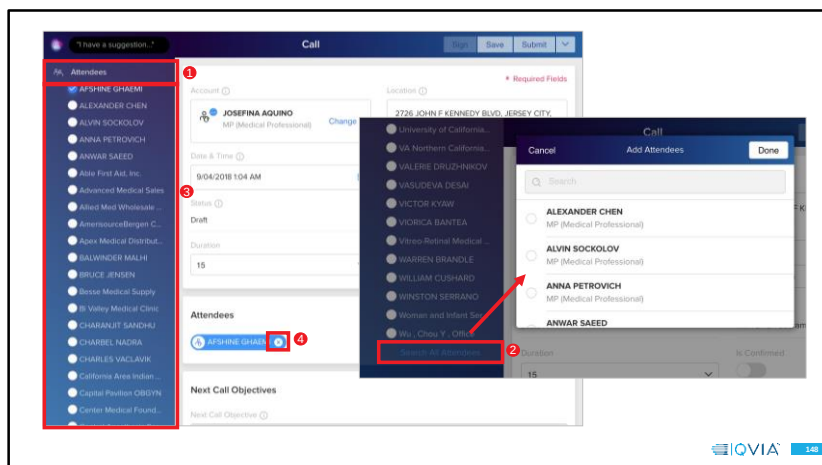

Notes:

TIP:

- Use the Change link in the Account section to modify the primary account for the call.

CALLS

- Create a Call
- Open the Call Screen
- Call Form
- **Call Elements**
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

ATTENDEES CALL ELEMENT

There will be times when you are visiting an account and other HCPs join the Call. You can add these attendees to a call. To add an attendee:

Notes:

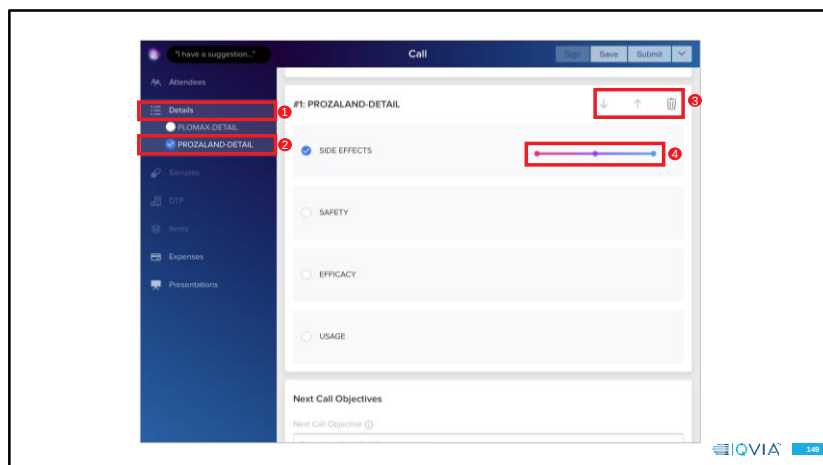

Step	Action
1	Tap the Attendees menu to access the list of Accounts with the same location as the primary Account.
2	To find accounts other than the ones available in the list, tap Search All Attendees at the bottom of the Attendees menu item. Find and tap the desired attendees and tap Done .
3	Select the desired attendees from the menu.
4	To remove an attendee from the list, tap the X to the right of the attendee's name in the Attendees section of the call screen. OR Tap to remove the check next to the attendee's name in the menu.

TIP:

- Only accounts aligned to your territory can be added to a call as attendees.

CALLS

- Create a Call
- Open the Call Screen
- Call Form
- **Call Elements**
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

DETAILS CALL ELEMENT

Details are product messages that should be conveyed to the account. You can access these messages and record your account's reactions as shown below:

Notes:

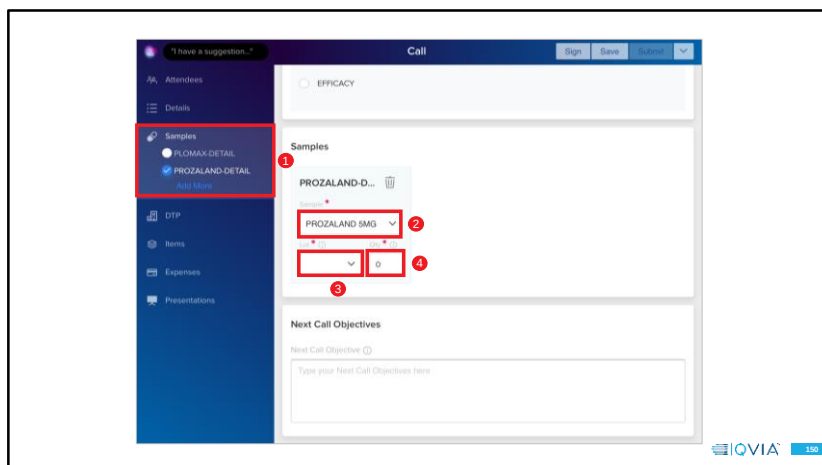

Step	Action
1	Tap Details menu item.
2	Select a Product from the list and select a related message.
3	Use trashcan icon to remove the PRODUCTS that were not detailed during the call.
4	Tap the message. Use slider to the right of the message to record your account's reaction. There are three possible reactions: Negative , Neutral , and Positive .

TIP:

- Recording the account's reaction is not required to submit a call.

CALLS

- Create a Call
- Open the Call Screen
- Call Form
- **Call Elements**
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

SAMPLES CALL ELEMENT

The **Samples** call element allows you to record samples handed to the account.

Notes:

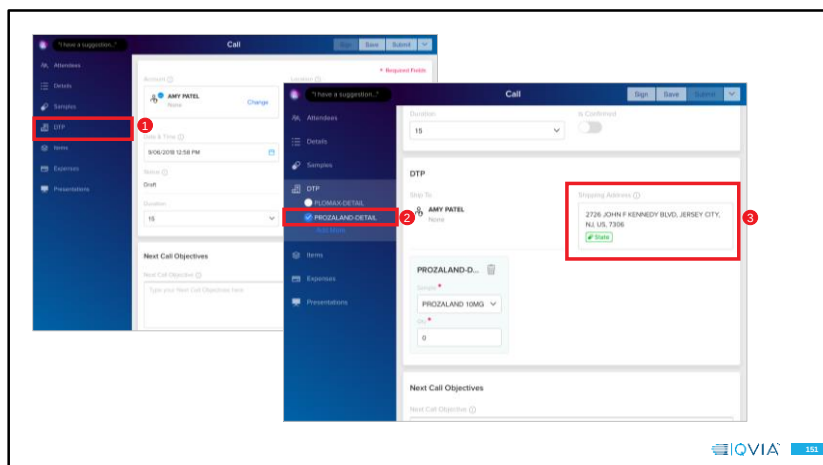

Step	Action
1	Tap Samples and tap the desired Product from the list of products that is displayed. <u>Note:</u> Only Products assigned to you will be displayed
2	Tap Sample and select a sample from the picklist in the Sample panel.
3	Tap Lot and select a lot from the picklist.
4	Tap Quantity and tap the quantity of samples you handed to your account.

TIPS:

- Use the **Add More** link to add additional samples for the same product to your call.
- Samples can be removed using the **Trash Can** icon.

CALLS

- Create a Call
- Open the Call Screen
- Call Form
- **Call Elements**
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

DTP CALL ELEMENT

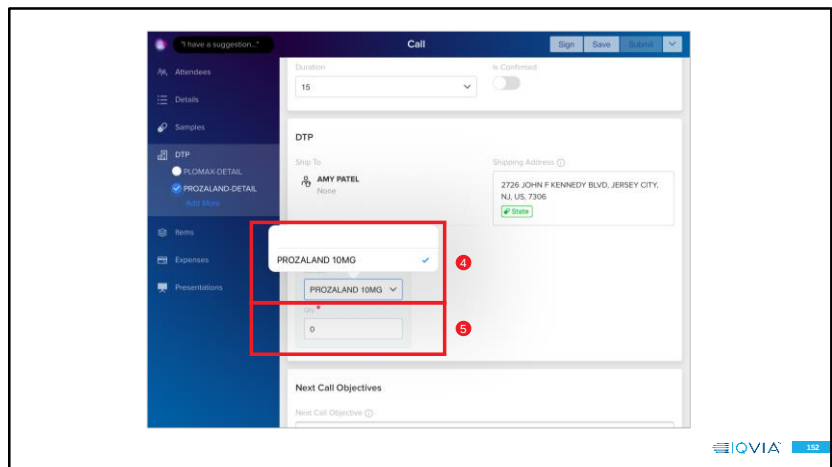

The DTP call element allows you to record samples that are to be sent directly to a practitioner.

Notes:

Step	Action
1	Tap the DTP menu item.
2	Tap the desired Product from the list of products that are displayed. <u>Note:</u> Only Products assigned to <i>you</i> will be displayed.
3	The preferred address is pre-selected as the default Shipping Address . Use the [v] button to expand the address list and select a different address.

CALLS

- Create a Call
- Open the Call Screen
- Call Form
- **Call Elements**
- Confirming Call Elements
- Product Details and Discussions
- Samples, DTP, or Items for an Attendee
- Call Statuses
- Enter the Date and Time of a Call
- Other Call Activities

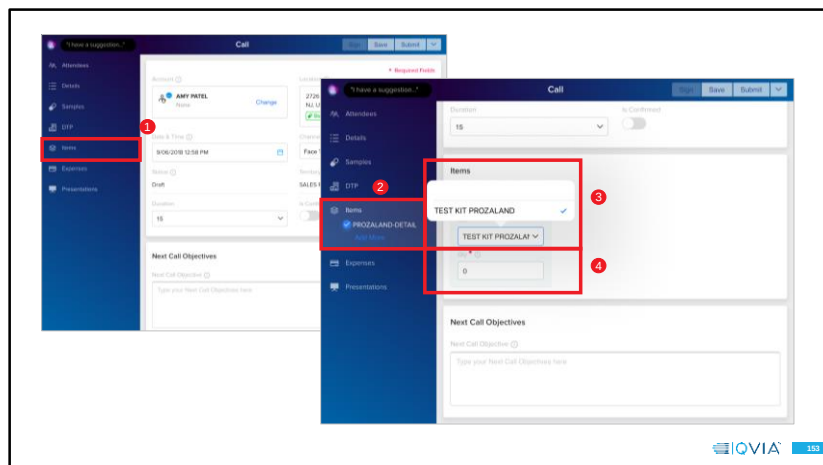

DTP CALL ELEMENT

Step	Action
4	Tap the Sample field and select a sample from the picklist.
5	Tap the Quantity field and tap the quantity of samples you would like shipped to your account.

Notes:

- Enter the Date and Time of a Call
- Other Call Activities

PRESENTATIONS WITH PRODUCT MESSAGES

*Product messages can be linked to presentation. If you launch a presentation with linked messages than those messages are added to the call as we saw in the **Details** section.*

- *When messages are reached in the presentation, the messages area opens up.*
- *The messages related to the presentation are automatically added to the call.*

Notes:

If	Then
You want to Return to the Presentation	1. Tap the header where the text Touch to return to Presentations appears.
You want to Return to the Call	2. Tap Call .
You want to remove the Presentation	3. Tap Cancel to remove the presentation and all data that was recorded from the call.

- Enter the Date and Time of a Call
- Other Call Activities

CONFIRMING CALL ELEMENTS

Details, Samples, DTP, or Items added to a Call may have to be confirmed by the account.

Notes:

If	Then
You want to Confirm a Sample	You can either: 1. Capture the account's signature. OR 1. Capture a paper form number or Document Id.
You want to Confirm Detail, DTP, or Items	1. Capture the account's signature.

TIPS:

- Once a signature or paper form number (also known as the Document ID) is captured:
 - Call elements requiring confirmation and the header of the call are locked down.
 - Both the Document ID option and the Sign button become disabled.
 - No more elements requiring confirmation can be added to the call.
- Calls with elements that require confirmation cannot be submitted until confirmation is complete.

CALLS

- Other Call Activities

Notes:

Signatures for Calls

An application administrator can enable the signature capture and Document ID features in your app and can assign a signature status to detail, sample, DTP, and item products, indicating whether a signature is mandatory, optional, or not required.

- If a mandatory signature product is in a call, you must obtain a signature before you can submit the call.
- If only optional signature products are in a call, you can obtain a signature, but you can submit the call without one.
- If only not required signature products are in a call, you can submit the call, but you can't obtain a signature.

After a signature is accepted or a Document ID is added:

- You can't change the account or the location of the call.
- You can't change the record type.
- You can't add, modify, or delete mandatory signature products in the call.
- You can add, modify, and delete optional and not required signature products before you submit the call.
- You can't delete the call if it has a mandatory signature product.

If the call only includes optional signature products, you can delete it if you haven't submitted it.

SIGNATURES FOR CALLS

An application administrator can enable the signature capture and Document ID features in your app and can assign a signature status to detail, sample, DTP, and item products, indicating whether a signature is mandatory, optional, or not required.

- *If a mandatory signature product is in a call, you must obtain a signature before you can submit the call.*
- *If only optional signature products are in a call, you can obtain a signature, but you can submit the call without one.*
- *If only not required signature products are in a call, you can submit the call but you can't obtain a signature.*

After a signature is accepted or a Document ID is added:

- *You can't change the account or the location of the call.*
- *You can't change the record type.*
- *You can't add, modify, or delete mandatory signature products in the call.*
- *You can add, modify, and delete optional and not required signature products before you submit the call.*
- *You can't delete the call if it has a mandatory signature product.*

If the call only includes optional signature products, you can delete it if you haven't submitted it.

- Enter the Date and Time of a Call
- Other Call Activities

SIGNATURE PAGE

The Signature page is made of the following sections

Element	Description
Signature Summary	Lists the call attributes requiring signature.
Control Panel	You can lock and accept signatures using the buttons in the control panel.
Signature Header	Contains details about the primary account of the call. You can change the primary account and indicate if the account requests a receipt in this element. Note: When changing the primary account, only attendees with the same address as the primary account are available for selection. After a change, the former attendee becomes the primary account on the call. The former primary account becomes an attendee.
Signature Area	This is the area where the account signs.

Notes:

- Other Call Activities

The screenshot shows the 'Call' screen in the IQVIA mobile app. The header bar is blue with the IQVIA logo and a 'Sign' button highlighted in red. The main content area is white and contains several sections: 'Duration' (15), 'DTP' (ABADULLA CHOUDRY, Medical Doctor), 'Shipping Address' (2726 JOHN F KENNEDY BLVD, JERSEY CITY, NJ, US, 7306), 'PLOMAX-DETAIL' (PLOMAX 10 MCG PE), and 'Next Call Objectives'. A 'Sign' button is highlighted in red at the top right. The bottom of the screen shows a blue bar with the IQVIA logo and a '100' indicator.

CAPTURE A SIGNATURE FOR A CALL

*If the signature capture feature is available in your app, after you add a mandatory or optional signature product to a call, the **Sign** button becomes available and you can capture a signature for the call.*

Make sure the correct account and location are selected and that you've entered information for the mandatory products in the call before you capture a signature.

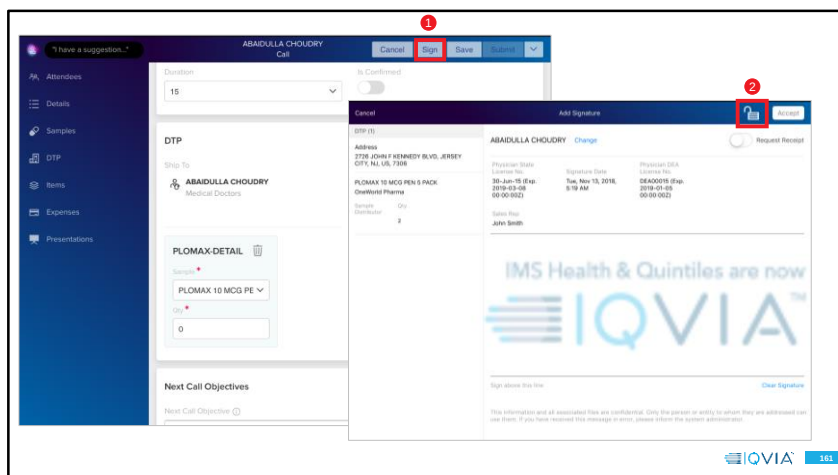

After a signature is accepted, you won't be able to:

- *Change the account or the location of the call.*
- *Add, modify, or delete mandatory signature products.*
- *Obtain another signature or add a Document ID.*
- *Delete the call.*

Notes:

The screenshot shows the IQVIA Call Form interface. On the left, a sidebar menu lists various call elements, with 'Details' highlighted in red. The main content area is divided into sections for product discussions. The first section, '#1: Aprodin', includes a radio button for 'Better than competition 2:1' and a text area for details. The second section, '#2: Glidim', includes a radio button for 'Glidim performs better than competition 3:1' and a text area. Below these is a 'Call Dialogues - Glidim Call Dialogue Survey' section with a question: 'Question 1: Would you be interested in being a speaker for Glidim?' with 'Yes' and 'No' radio buttons. The top of the form has a header with the user's name 'Abart G Howard' and the word 'Call', along with buttons for 'Cancel', 'Sign', 'Save', and 'Submit'.

PRODUCT DETAILS AND DISCUSSIONS

*In the **Details** section, you can select products that are discussed on a call with an HCP or KOL.*

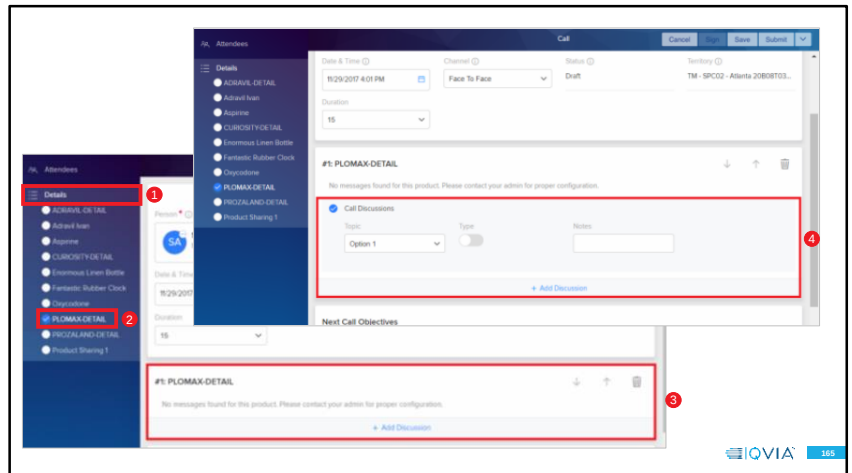

Notes:

A product discussion may be:

- *Required, so you must use it in the call;*
- *Automatically added to the call, so you're encouraged to use it; and*
- *Limited to one, so it can only be used once in the call.*

SAMPLES, DTP, OR ITEMS FOR AN ATTENDEE

If an application administrator configures the child call feature, child calls are created for HCPs and InsDocs that attend a group call. In the group call, you can go to the child call, where you can enter samples, DTP, and items for an individual attendee.

To enter samples, items, and DTP for an attendee:

Step	Action
1	Tap the account in the Attendees section in the group call and select Child Call .
2	Enter samples, DTP, and items for the attendee.

NOTE:

The call header displays information from the group call and you can't modify it in the child call.

Notes:

SAMPLES, DTP, OR ITEMS FOR AN ATTENDEE

To enter samples, items, and DTP for an attendee:

Notes:

Step	Action
3	Tap any of the buttons at the upper-right corner of the screen based on the requirement: • Cancel: Discards unsaved changes and returns to the group call. • Sign: Obtains a signature to confirm samples, DTP requests, or items that require a signature in the call. • Save: Saves information you've entered and keeps the child call open. You can return to it later from the group call by tapping the attendee and selecting child call. • Submit: Unavailable for a child call. Child calls are automatically submitted when you submit the group call.

TIP:

To return to the group call after capturing a signature, tap **Cancel** in the child call.

- Other Call Activities

CALL STATUSES

Calls will change their status as you save and submit them.

Status	Impact
Draft	<u>Related Taps:</u> Save Call can be saved, submitted, edited, deleted. <u>Note:</u> if a signature or document ID has been captured, the call cannot be deleted, and sample details cannot be modified.
Submitted	<u>Related Taps:</u> Submit Call can no longer be modified or deleted. Calls cannot be submitted if: • At least one detailed product or one sample has not been selected. • There are validation conflicts. • Required field(s) have not been completed. • Confirmation is required for Call attributes and signature or Document ID has not been captured. After the call has been submitted, the fields of the call form become locked. <u>Note:</u> The call cannot be submitted if the date is in the future or if mandatory elements are missing.
	<u>Related Taps:</u> Delete • A call can be deleted only if its status is Draft and Signature or Document ID has not been captured.

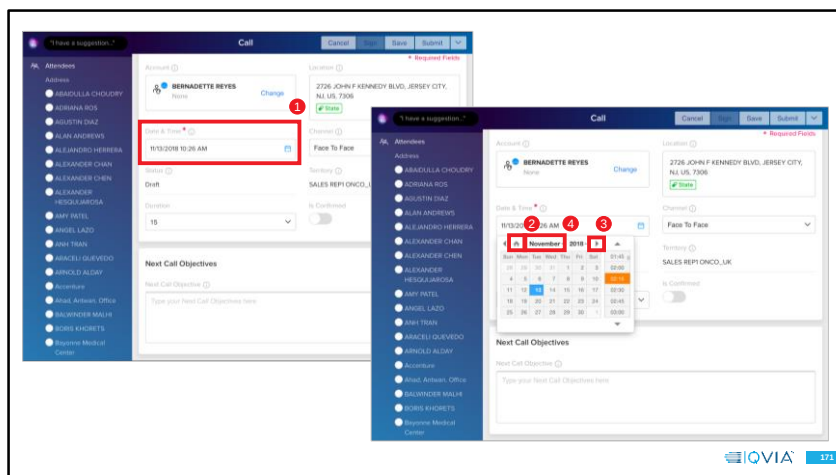

TIP:

- Tap **Cancel** to discard your changes.

Notes:

ENTER THE DATE AND TIME OF A CALL

You can enter or modify the date and time of a call subject to the following terms:

- Calls must be within your business hours and can't overlap a holiday or time off territory.
- An application administrator can configure a limit for the number of days in the future for creating calls.
- If a signature was captured for the call, the call date must be the same as the signature date for you to submit it.
- If you change the date and time of a remote call, the remote detailing application will send an updated email to the account and to attendees.

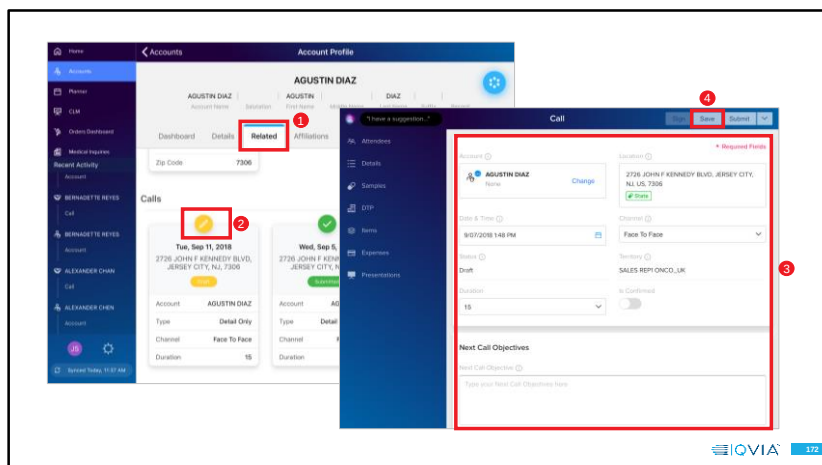

To enter the date and time of a call:

Step	Action
1	Tap Date & Time in the Call section to open the date and time selection box.
2	Tap Home to select the current date.
3	Tap the arrow next to the month name to go to the next or previous month.
4	Tap the month name and then select a month to go directly to a month.
5	Tap outside the selection box to enter the date and time in the call.

EDIT A CALL

Many times you will capture a few call details during your visit but won't be able to capture them all.

Notes:

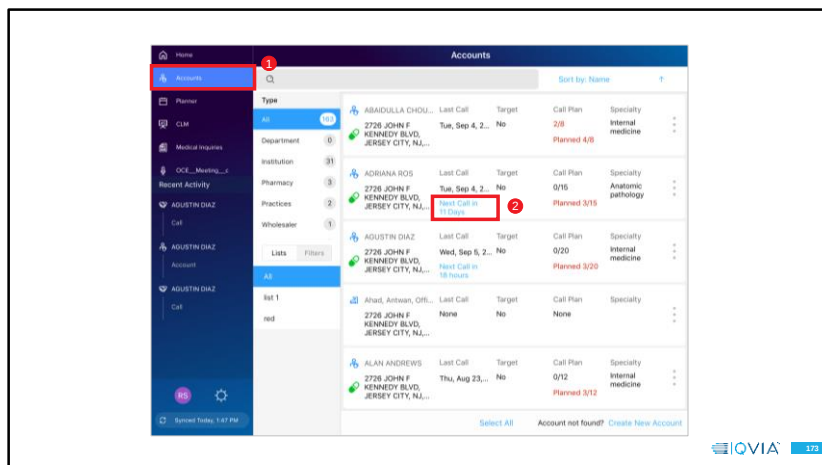

Step	Action
1	Go to Related tab of Account Profile.
2	Tap Edit .
3	Edit call data.
4	Tap Save .

TIPS:

- You can edit only Calls with Draft Status.
- You cannot edit Call elements requiring confirmation once Signature or Document ID has been captured.
- You cannot edit the following fields once Signature or Document ID has been captured regardless of call status:
 - Account
 - Address
 - Date & Time

- Add Attendees to a Presentation

PRESENTATION PLAYER

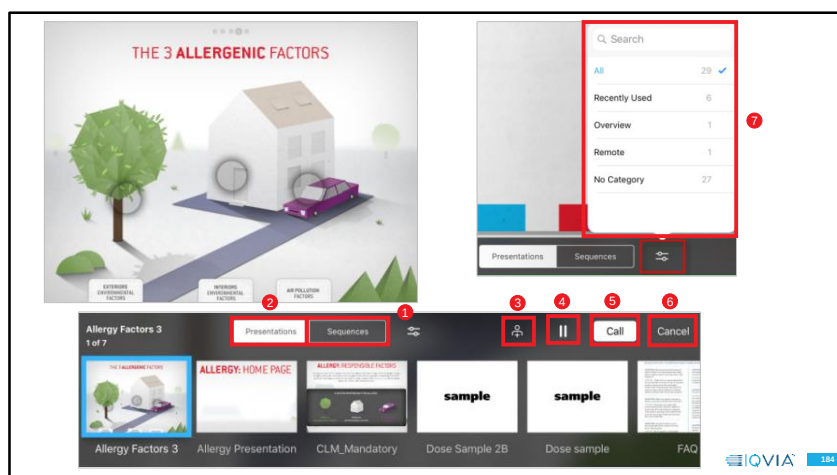

Depending on how an application administrator configures your app, after you tap the thumbnail for a presentation, it opens in play mode (tracking information for a call) or in training mode (with tracking paused).

Presentations can be coded so they are interactive. For example, you might be able to tap an image or a link in a presentation to display more information or to play a video, capture feedback, or complete a survey. You might be able to stretch, double-tap, and pinch to zoom in and out on an HTML slide or stretch and pinch to zoom in and out on a PDF slide, depending on how it's been coded. To go to the next or previous sequence in the presentation, short-swipe left or right. You must wait a fraction of a second between swipes.

Notes:

CLOSED LOOP MARKETING (CLM)

PRESENTATION PLAYER

When you play a presentation, the player options are hidden. To display them, you can use the gesture that's been configured to display them in the presentation. For example, you can swipe up from the bottom of the screen, tap the bottom of the screen, swipe down from the top of the screen, or tap the top of the screen.

When displayed, the presentation player shows several options.

Step	Action
1	Tap Sequences and then tap a sequence thumbnail to go to a specific sequence in the current presentation.
2	Tap Presentations and then tap a presentation thumbnail to go to a different presentation.
3	Tap Add Attendee to select attendees.
4	Tap Pause to stop tracking time for a call.
5	Tap Call to go to the Call screen.
6	Tap Cancel and then tap Yes if you want to close the presentation and discard the information recorded without adding it to the call.
7	Tap  to filter presentations based on category.

Notes:

CLOSED LOOP MARKETING (CLM)

- Access the CLM Page
- CLM Presentations
- Mandatory Sequences
- Presentation Controls
- Search and Play Presentations
- Presentation Player
- **Add Attendees to a Presentation**

ADD ATTENDEES TO A PRESENTATION

You can add accounts that are attending the call in the presentation player. The account and attendees that you enter in the player are added as attendees in the call.

To add attendees for a call in the presentation player:

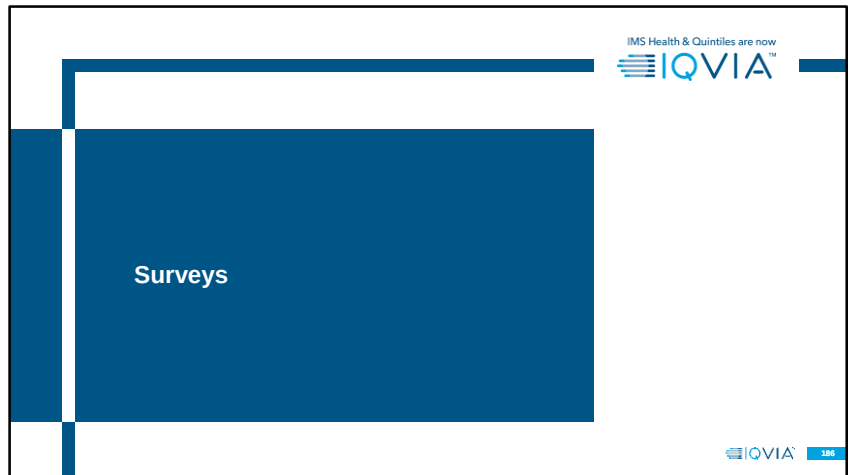

Notes:

Step	Action
1	Use the gesture that's been configured to display player options in the presentation and then tap Add Attendee .
2	Tap to select one or more attendees for the call in the Select an Attendee box.
3	The number of selected attendees is displayed on the Add Attendee icon.

NOTE:

Adding attendees applies only if an application administrator enabled attendees for calls in your app and if attendees are applicable in the call page layout for the record type.

Surveys

Notes:

Surveys

An administrator can create surveys to get information from accounts. A survey can be made available:

- By territory, so it is available to anyone who is working in the territory.
- By account, so it is available to anyone who has the account in their territory.

If a survey is available for you to complete, a notification is displayed on your Home Page.

You can view available surveys in the profile for an account and go to an open survey for an account to complete it from the account profile or from a call that you're entering. You can save a partially completed survey and return to it later from where you left off and complete it. After a survey is submitted, you can only view it.

INTRODUCTION

An administrator can create surveys to get information from accounts. A survey can be made available:

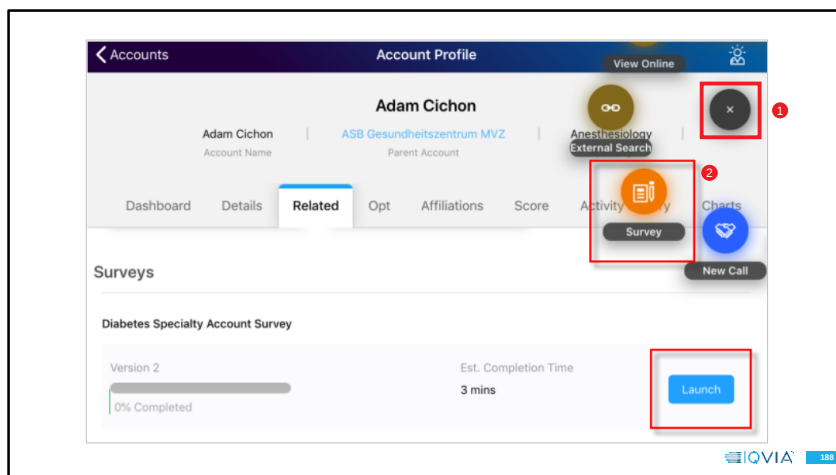

- *By territory, so it is available to anyone who is working in the territory; or*
- *By account, so it is available to anyone who has the account in their territory.*

*If a survey is available for you to complete, a notification is displayed on your **Home Page**.*

You can view available surveys in the profile for an account and go to an open survey for an account to complete it from the account profile or from a call that you're entering. You can save a partially completed survey and return to it later from where you left off and complete it. After a survey is submitted, you can only view it.

SURVEYS

EMAIL WORKFLOW

If an application administrator configured the option, you can use an email template to send an email to an account from the profile.

The app can be configured so that you can use templates to send an email from a meeting, a call, an account profile, and the Accounts screen.

The generic steps to send an email are:

Step	Action
1	Initiate an email by selecting Email in a meeting, call, account profile, or on the Accounts screen.
2	Choose a template and the attachments you want to include.
3	Select recipients, enter email addresses, and send the email.

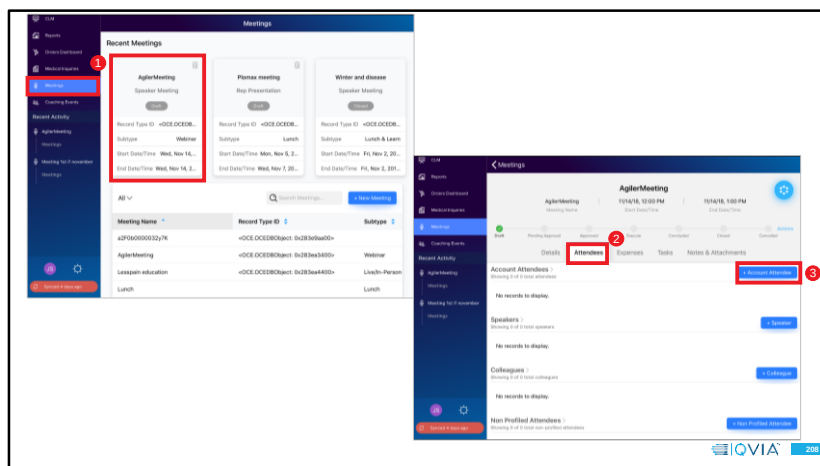

NOTE:

If the Opt module is enabled in your app, the system only sends email if the HCP has opted in for the email address and for all the topics associated with the template. You can view the HCP's opt status for an email address and can capture consent if it's needed for the email to be sent.

Notes:

EMAIL

- Email Workflow
- **Initiate Email**
- Choose a Template and Attachments
- Select Recipients, Email Addresses, and Send
- View Email Activity History
- Opt Management

INITIATE EMAIL

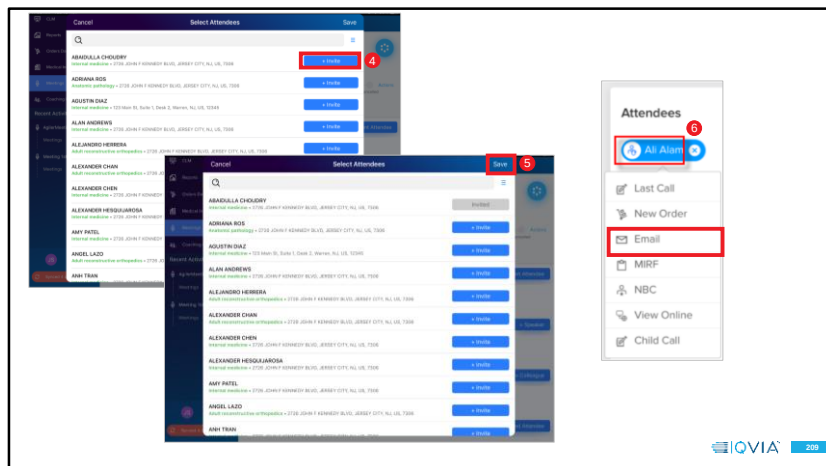

To initiate an email from a meeting:

Step	Action
1	Go to Meetings and tap any of the recent meetings.
2	Tap Attendees .
3	Tap Account Attendees .

Notes:

EMAIL

- Email Workflow
- **Initiate Email**
- Choose a Template and Attachments
- Select Recipients, Email Addresses, and Send
- View Email Activity History
- Opt Management

INITIATE EMAIL

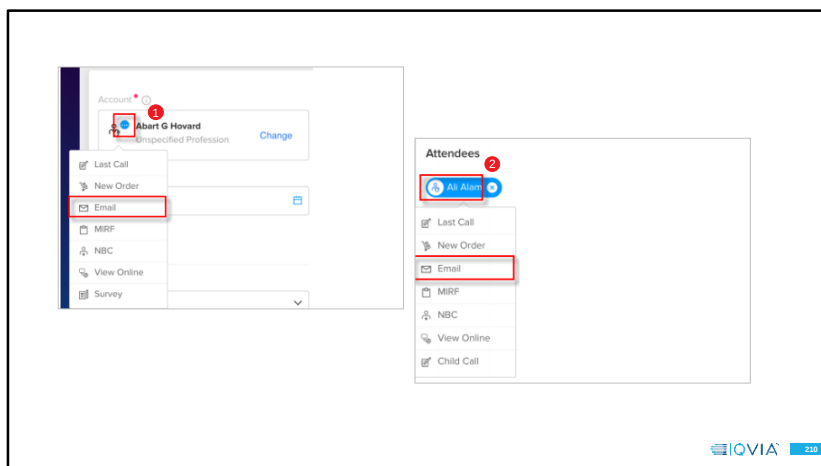

To initiate an email from a meeting:

Step	Action
4	Select the attendee and tap Invite .
5	Click Save .
6	Select the attendees you want to receive the email and then tap Email .

Notes:

EMAIL

- Email Workflow
- **Initiate Email**
- Choose a Template and Attachments
- Select Recipients, Email Addresses, and Send
- View Email Activity History
- Opt Management

INITIATE EMAIL

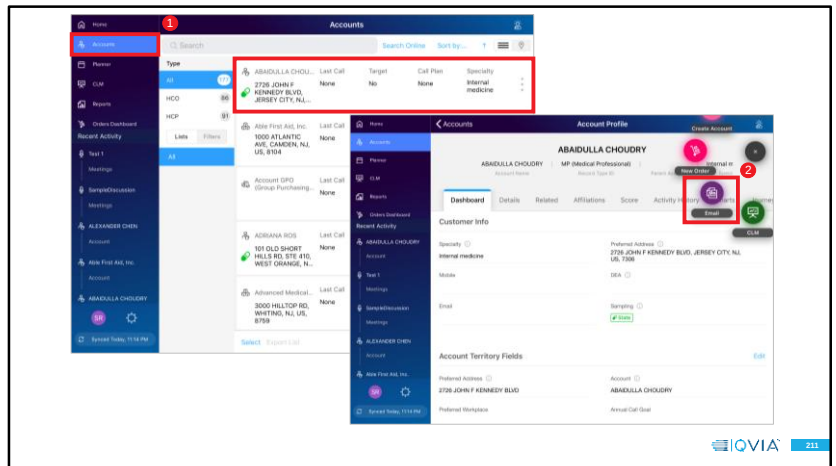

To initiate an email from a call:

Step	Action
1	Tap Ellipsis for the account in a call and then select Email to send the email to the account.
2	Tap the attendee and then select Email to send the email to the attendee.

Notes:

EMAIL

- Email Workflow
- **Initiate Email**

- **Opt Management**

OPT MANAGEMENT

You can enter or update opt information for an HCP from the account profile and when you're using a template to send an email.

To enter or update opt information:

Step	Action
5	The HCP must agree to the terms and conditions by tapping the Terms and Conditions link below the disclaimer to update consent information.
6	The HCP taps I Agree at the bottom after reviewing the terms and conditions.
7	Select Request Receipt if the HCP wants to request a copy of the consent information from your company.

OPT MANAGEMENT

You can enter or update opt information for an HCP from the account profile and when you're using a template to send an email.

To enter or update opt information:

Step	Action
8	The HCP signs where indicated and taps Accept to update opt information if a signature is required or optional.

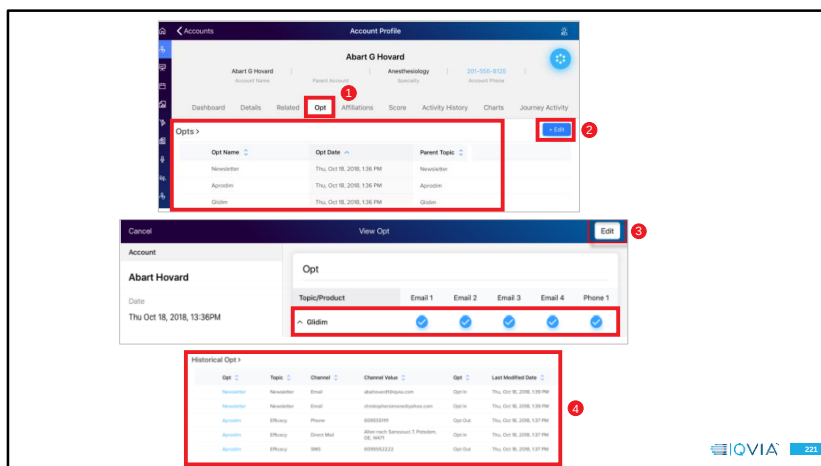

NOTE:

If a Document ID is required or optional, instead of a signature, you can enter the number associated with the signed paper form and tap **Accept** to update opt information. If neither a signature nor a Document ID is required, tap **Accept** to update opt information without them.

- Opt Management

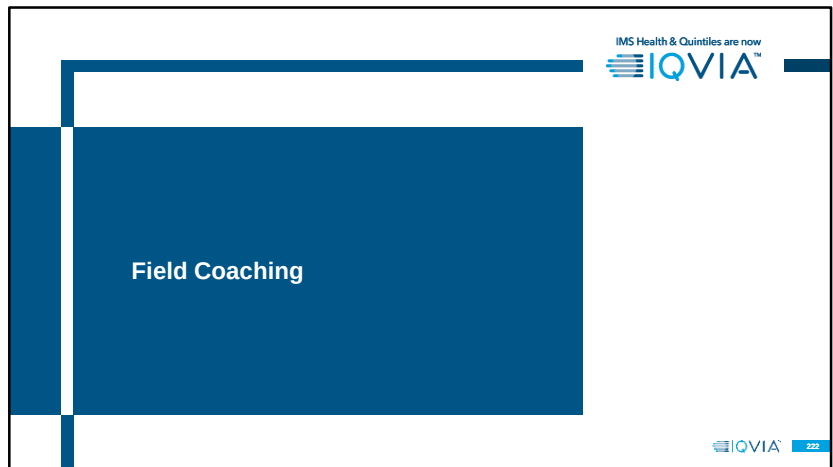

OPT MANAGEMENT

To view opt information:

Step	Action
1	Select Opt in the profile of an HCP to view active opt records and historical opt information. You can enter or update opt information for the HCP or view opt information first and then update it. The Opts section displays a summary of active opt information for parent topics.
2	Tap + Edit to update the HCP's opt information.
3	Tap a row to view current opt information and then tap Edit if you want to update it.
4	Active and historical opts are displayed in the Historical Opts section. The following information is displayed for each update: • Opt and Topic: Parent and child topic names. • Channel and Channel Value: The channel that was updated and the value that was associated with it when the update was made. • Opt: Indicates whether the update was Opt In or Opt Out. • Last Modification Date: The date and time the information was updated.

District Manager:

IQVIA 223

INTRODUCTION

The goal of coaching is to observe employees, evaluate their performance, and suggest development plans to help them improve their skills and increase their performance.

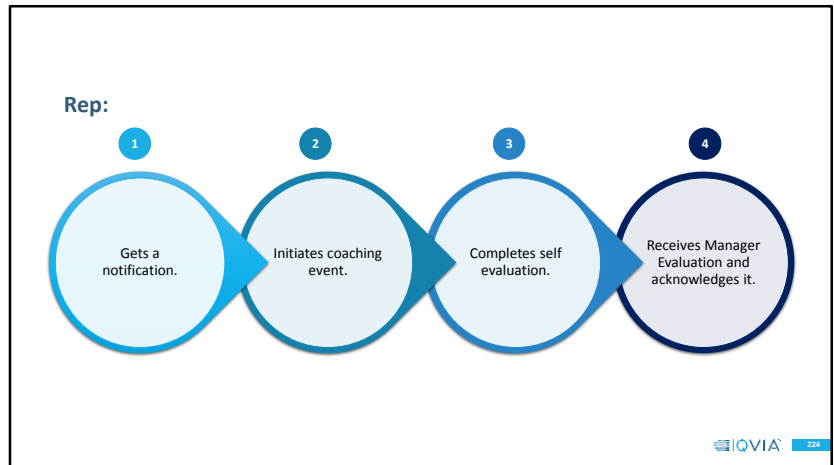

From Manager side:

Item	Description
1	District Manager plans the coaching event and chooses which Coaching Template to use for evaluation and the employee to evaluate.
2	The Coaching Event takes place.
3	The Manager requests the Employee to self evaluate himself. (optional)
4	The Manager enters his evaluation, comments and development plans.
5	The Manager publishes the Evaluation for Employee Acknowledgement. (optional)
6	The Manager finishes the event.
